## 1. Connectors

### 1.1 Anderson Power

#### 1.1.1 E Series

The Anderson™ family of Euro Battery Connectors (EBC) are expertly designed for ease of use and incorporate an innovative contact carrier to simplify assembly. The EBC connectors include the industry standard 80, 160, and 320 sizes, all in accordance with DIN 43589-1. Design and materials offer performance that meets or exceeds all the requirements of EN1175-1. All materials chosen are RoHS compliant and selected to ensure years of reliability in adverse industrial environments. These attributes make the EBC DIN connectors the ideal choice for a wide range of industrial applications in the Material Handling, Battery Charging, Utility Vehicles, Motive Power, and Sweeper/Scrubbers markets amongst many others.

# ANDERSON POWER™

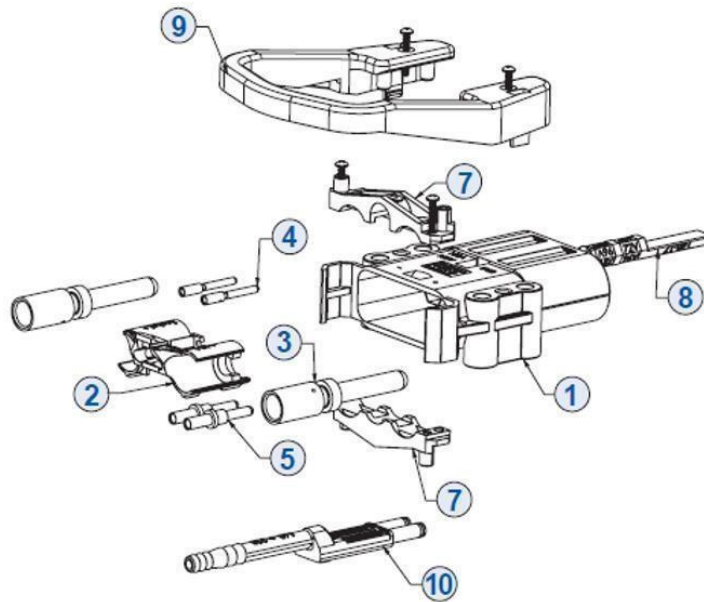

**Female connector E80**

Item	Ordering code	Description
1+2+6+7+8	E80500-0009	Housing APP type "E" 80 – Female – Grey Coding Pin
3	EC80-1110 EC80-1116 EC80-1125 EC80-1135	Main Contact APP DIN 80 Female – 10 mm <sup>2</sup> (8 AWG) Main Contact APP DIN 80 Female – 16 mm <sup>2</sup> (6 AWG) Main Contact APP DIN 80 Female – 25 mm <sup>2</sup> (4 AWG) Main Contact APP DIN 80 Female – 35 mm <sup>2</sup> (2 AWG)
4	EHC80-33	Upper Auxiliary Contact APP DIN type 80 "E" Female – 1,5 mm <sup>2</sup>
5*	EPC80-31	Lower Pilot Auxiliary Contact APP DIN type 80 "E" Female – 1,5 mm <sup>2</sup>
6	NA	Not applicable on E80
8	EVKS80-9 EVKD80-17 EVKS80-23F EVKD80-22F	Coding Pin DIN 80 Grey – Wet Coding Pin DIN 80 Green – Dry Coding Pin DIN 80 Red – Wet – High Current Coding Pin DIN 80 Blue – Dry – High Current
9	EHDL80-8 EHDL80-8-R	Handle APP DIN 80 Low Profile with 2 screws Red Handle APP DIN 80 Low Profile with 2 screws
10*	ETAT80-21	Air Adapter APP DIN type 80 – Female

\* Lower pilot auxiliary contacts use the same housing location as air tubes so they cannot be used together

### Male connector E80

Item	Ordering code	Description
1+2+7+8	E80400-0009	Housing APP type "E" 80 – Male – Grey Coding Pin
3	EC80-1010 EC80-1016 EC80-1025 EC80-1035	Main Contact APP DIN 80 Male – 10 mm <sup>2</sup> (8 AWG) Main Contact APP DIN 80 Male – 16 mm <sup>2</sup> (6 AWG) Main Contact APP DIN 80 Male – 25 mm <sup>2</sup> (4 AWG) Main Contact APP DIN 80 Male – 35 mm <sup>2</sup> (2 AWG)
4	EHC80-32	Upper Auxiliary Contact APP DIN type 80 "E" Male – 1,5 mm <sup>2</sup>
5*	EPC80-30	Lower Pilot Auxiliary Contact APP DIN type 80 "E" Male – 2,5 mm <sup>2</sup>
8	EVKS80-9 EVKD80-17 EVKU80-19 EVKS80-23M EVKD80-22M	Coding Pin DIN 80 Grey – Wet Coding Pin DIN 80 Green – Dry Coding Pin DIN 80 Yellow – Universal Coding Pin DIN 80 Red – Wet – High Current Coding Pin DIN 80 Blue – Dry – High Current
9	EHD80-8 EHD80-8-R	Handle APP DIN 80 Low Profile with 2 screws Red Handle APP DIN 80 Low Profile with 2 screws
10*	ETAT80-20	Air Adapter APP DIN 80 – Male

\* Lower pilot auxiliary contacts use the same housing location as air tubes so they cannot be used together

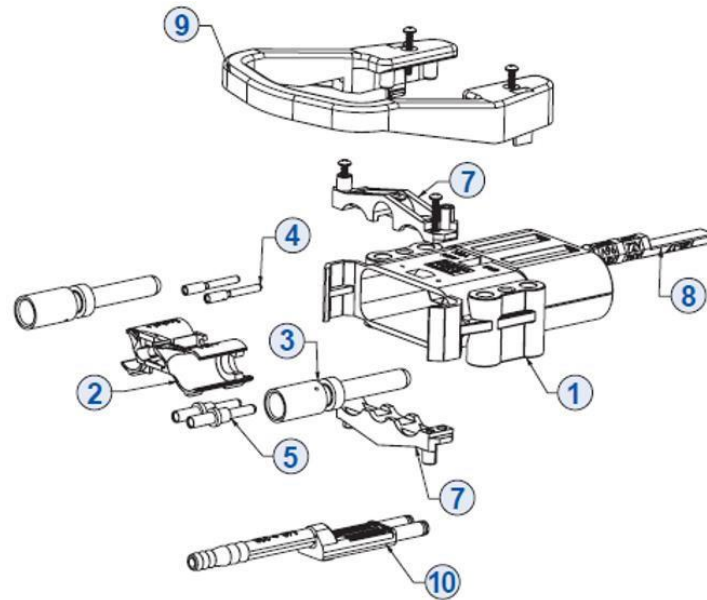

<b>Ordering code</b>	
Example:	<b>E80535-1009</b>
Series: _____ E80	
Gender: _____ 4 – Male 5 – Female	
Main contacts: _____ 00 – Non – order separately 10 – 10 mm <sup>2</sup> (8 AWG) 16 – 16 mm <sup>2</sup> (6 AWG) 25 – 25 mm <sup>2</sup> (4 AWG) 35 – 35 mm <sup>2</sup> (2 AWG)	
Handle: _____ 0 – None 1 – Black* 2 – Red* <small>*E80 comes with the low-profile T handle.</small>	
Coding key: _____ 0 – Grey, wet cell 2 – Green, dry cell 3 – Yellow, universal (only on male housing) 4 – Blue, dry cell, high current 5 – Red, wet cell, high current	
Auxiliary contacts & Air Tubes: _____ 0 – None 1 – Lower pilot auxiliary contacts 2 – Upper auxiliary contacts 4 – Lower pilot auxiliary & upper auxiliary contacts 5 – Air Tube 6 – Air Tube & Upper auxiliary contacts	
Packing: _____ 9 – Individual 8 – Bulk	

### Female connector E160

Item	Ordering code	Description
1+2+6+7+8	E16500-0009	Housing APP type "E" 160 – Female – Grey Coding Pin
3	EC160-1116 EC160-1125 EC160-1135 EC160-1150	Main Contact APP DIN 160 Female – 16 mm <sup>2</sup> (6 AWG) Main Contact APP DIN 160 Female – 25 mm <sup>2</sup> (4 AWG) Main Contact APP DIN 160 Female – 35 mm <sup>2</sup> (2 AWG) Main Contact APP DIN 160 Female – 50 mm <sup>2</sup> (1 to 1/0 AWG)
4	EHC160-33	Upper Auxiliary Contact APP DIN type 160 "E" Female – 4,0 mm <sup>2</sup>
5*	EPC160-13	Lower Pilot Auxiliary Contact APP DIN 160/320 "E" Female – 6,00 mm <sup>2</sup>
6	EACH320-38	Auxiliary Contact Holder APP DIN 160/320
8	EVKS160-9 EVKD160-17 EVKS160-23F EVKD160-22F	Coding Pin DIN 160/320 Grey – Wet Coding Pin DIN 160/320 Green – Dry Coding Pin DIN 160/320 Red – Wet – High Current Coding Pin DIN 160/320 Blue – Dry – High Current
9	EHDL160-320-H EHDL160-320-L	Handle APP DIN 160/320 High Profile with 2 screws Handle APP DIN 160/320 Low Profile with 2 screws
10*	ETAT160-21	Air Adapter APP DIN type 160 – Female

### Male connector E160

Item	Ordering code	Description
1+2+7+8	E16400-0009	Housing APP type "E" 160 – Male – Grey Coding Pin
3	EC160-1016 EC160-1025 EC160-1035 EC160-1050	Main Contact APP DIN 160 Male – 16 mm <sup>2</sup> (6 AWG) Main Contact APP DIN 160 Male – 25 mm <sup>2</sup> (4 AWG) Main Contact APP DIN 160 Male – 35 mm <sup>2</sup> (2 AWG) Main Contact APP DIN 160 Male – 50 mm <sup>2</sup> (1 to 1/0 AWG)
4	EHC160-32	Upper Auxiliary Contact APP DIN type 160 "E" Male – 4,0 mm <sup>2</sup>
5*	EPC160-12	Lower Pilot Auxiliary Contact APP DIN 160/320 "E" Male – 6,0 mm <sup>2</sup>
8	EVKS160-9 EVKD160-17 EVKU160-19 EVKS160-23M EVKD160-22M	Coding Pin DIN 160/320 Grey – Wet Coding Pin DIN 160/320 Green – Dry Coding Pin DIN 160/320 Yellow – Universal Coding Pin DIN 160/320 Red – Wet – High Current Coding Pin DIN 160/320 Blue – Dry – High Current
9	EHDL160-320-H EHDL160-320-L	Handle APP DIN 160/320 High Profile with 2 screws Handle APP DIN 160/320 Low Profile with 2 screws
10*	ETAT160-20	Air Adapter APP DIN 160 – Male

### 1.1.3 SB Series

Based off the design pioneered by Anderson™ in 1953, the two pole SB connectors set the standard for DC power distribution and battery connections. SB 50 connectors feature a one-piece plastic housing using stainless steel springs to hold low resistance contacts in place. Wires sizes from 16 to 6 AWG (1.5 to 13.3 mm<sup>2</sup>) are held in the smallest of the SB series housings.

### 1.1.4 SBE Series

SBE connectors build on the capability of the SB connectors that handle two primary power contacts with the capacity to have up to 8 auxiliary power / signal contacts. The centers of the connector housing feature a location for either: two PP15-45 housings and contacts, an innovative 1x4 auxiliary accessory, or two PPMX housings that can accommodate up to 8 aux contacts. In addition, the housing meets IEC 60950 & IEC60529 touch safe requirements.

Sequencing within auxiliary positions is possible using the 4 pin lengths available in the 1x4 auxiliary accessory however the auxiliary contacts mate last / un-mate first in relationship to the power contacts. The SBE connector housings are molded from a chemical resistant PBT/PC blend resin allowing them to meet EN1175-1 requirement and are tested to EN1175-1 standards.

### 1.1.5 SBX/SBO Series

SBX and SBO connectors build on the capability of the SB connectors that handle two primary power contacts with the capacity to have up to 8 auxiliary power / signal contacts. The centers of the connector housing feature a location for either: two PP15-45 housings and contacts, an innovative 1x4 auxiliary accessory, or two PPMX housings that can accommodate up to 8 aux contacts. In addition, the housing meets IEC 60950 & IEC60529 touch safe requirements.

Sequencing within auxiliary positions is possible using the 4 pin lengths available in the 1x4 auxiliary accessory however the auxiliary contacts mate last / un-mate first in relationship to the power contacts. SBX are molded from a rugged PC resin that is more impact resistant and are tested to UL/CSA requirements.

### 1.1.6 PowerPole

This versatile connector series invented by Anderson Power Products (APP) meets a wide range of power connection needs. The four housing sizes in the Powerpole product family can carry a wide range of amperage and wire sizes in the most compact footprint. For currents up to 350A and from wire sizes of #20 AWG (0,75 mm<sup>2</sup>) to 3/0 (70 mm<sup>2</sup>). Powerpole can handle them all! A wide range of colored housing options can be stacked together to create a proven reliable custom connector. These housings can be used with different contacts to create wire-to-wire, wire-to board, or wire-to-busbar connections. The Powerpole® connector combines high quality materials with a cost-effective and innovative design for powerful versatility.

# ANDERSON POWER™

## 1.2 Rema

### 1.2.1 Euro Din Connectors

REMA is the leading supplier of DIN-style (DIN standard 43589) quick disconnect power connectors. These quick disconnect power connectors are used in a variety of applications, including:

Materials Handling - Aerial Lift - Sweeper/Scrubber - Utility Vehicles - Motive Power - Battery Chargers.

In order to withstand the frequent use in these rough environments it is imperative that the construction of these connectors be extremely robust. The REMA brand DIN-style connectors exceed the requirement of the DIN Standard 43589 for both mechanical and electrical durability.

To meet the demands of newer high-current applications, including “fast charging”, REMA has developed a

larger capacity DIN 640 A connector.

Contacts are made from E-Cu copper optimized for crimp connection. Crimp tooling and dies are contained in this catalogue. Only the use of REMA crimp equipment results in full warranty.

Features of the REMA DIN-style connector include:

- Housing constructed of glass fiber reinforced composite material for extreme durability and resistance battery acid
- REMA engineered contacts made of high-grade electrolyte copper and silver plated for corrosion protection
- UL 1977 certified component
- Meets or exceeds the following industry standards: DIN 43589, EN 1175-1, IEC 20989, UL1977
- In compliance with machinery directive 2006/42 EG and therefore with „CE“Marking
- Accepts REMA DIN-Style Connector Options including coding/locking pins, air supply, auxiliary contacts, and handles
- Small number of parts
- Easy, intuitive assembly

### 1.2.2 FT Connector

To ensure optimal electrical motor performance it is imperative to use a reliable, high-quality connection. The REMA Motor Connectors guarantee a long-lasting connection with low power losses.

The design of the motor connectors is extremely compact. That means high amperage – small dimensions. Each connection fulfils the highest quality standards and shows functionality, easy handling, robust reliability, and economy. The type FT 80 is in correspondence with French industrial standard and the European EN 1175-1 standard.

REMA motor connectors are suitable for use in the following applications:

- Personnel / Burden Carriers
- Golf Carts
- Sweeper / Scrubber Floor Cleaning Equipment
- Boating
- Light On-Highway Caravans, Trailer, and Mobile Homes

Contacts are made from E-Cu copper optimized for crimp connection.

### 1.2.3 JH Connector

Prior to standardization REMA has developed a two-pole electrical connection. These robust connectors have proved their reliability already for decades within the REMA product portfolio. The focus of applications of these connectors are electrical connections between trailer and towing machine on road trucks.

The contact design has large connection surfaces with a spring-loaded connector pin sliding into the sleeves inside the female connector. The result is an extremely low resistance in the electrical connection. The contacts show a differentiation between solder and crimp connections.

On top the twin plug and sockets have:

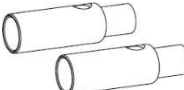

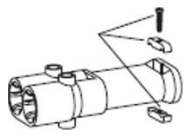

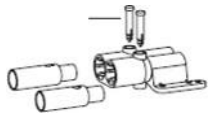

- mechanical robustness
- constant extraction forces
- protection against humidity, acids, and UV radiation
- reliable design for long lifetimes and vibration protection

### Connectors

### 1.2.4 MRC Connector

Patented high power connector which has been specifically designed for the quick and opportunity charging of large battery capacities.

Compliant with DIN EN 0623-589 and EN 1175-

Various cable sizes from 16 mm<sup>2</sup> to 95 mm<sup>2</sup>

The gas-tight connection between cable and connector housing allows a higher current carrying capacity (Patented MRC technology)

Used in combination with the REMA Flex cable, which has a special jacket, results in significantly higher performance and durability.

Preassembled cables in the different sizes guarantee short installation times and therefore save money.

High current rated according to DIN VDE 0623-589 (Current Rating II) depending on the cable size.

Special characteristics of the material (chemically coupled, heat and alkali-stabilized copolymer), ensure high resistance against battery acid and UV.

High-grade contacts made from pure high conductive Cu-ETP copper with silver plated surface and an anti- friction and tarnish coating ensure.

- > a power transition with minimal losses
- > long life

Design matches the DIN 80, DIN 160, and DIN 320

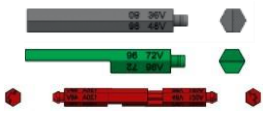

All accessories of the REMA DIN series like coding pins, auxiliary contacts and pilot contacts can be interchangeable.

### 1.2.5 SR Connector

Reliable power connection solution for

- Electric vehicle batteries
- Battery chargers
- Forklift trucks
- Other DC voltage applications

Operating voltage determined by housing colour

- Simplifies mating of same voltages

Plug and socket with identical housing design.

- Reduces quantity of components
- Reduces purchasing and storage cost
- Acid resistant housing material Handles, strain relieves available.

CE Marking & UL recognized.

Contacts sized for AWG (American Wire Gauge)

REMA developed high-grade contacts made from pure high conductive Cu-ETP copper with silver plated surface and an anti-friction and tarnish coating ensure.

- Power transition with minimal losses
- Long life
- Suitable for crimping

Green	78316-01	78316-00	78317-00	on request

### Standard housings

Color	Ordering code	Description
Gray	78135-00	Housing SR 350 – Gray
Red	78138-00	Housing SR 350 – Red
Blue	78136-00	Housing SR 350 – Blue
Green	78139-00	Housing SR 350 – Green

 **Silver plated wire contacts**

Section	Ordering code	Description
AWG 1/0	78273-00	Main Contact SR 350 – 1/0 AWG
AWG 2/0	78275-00	Main Contact SR 350 – 2/0 AWG
AWG 3/0	78275-05	Main Contact SR 350 – 3/0 AWG
AWG 4/0	78275-10	Main Contact SR 350 – 4/0 AWG

**Accessories**

Picture	Ordering code	Description
	78297-04 78298-04	Handle SR350/SRE320/SRX350 – Gray Handle SR350/SRE320/SRX350 – Red
	78297-02	Handle SR350/SRE320/SRX350 – Gray – with 2 screws 1/4" x 43
	78011-00	Metallic Strain Relief Cable Clamp REMA SR 350

### 1.2.6 SRE Connector

Reliable power connection solution for

- Electric vehicle batteries
- Battery chargers
- Forklift trucks
- Other DC voltage applications

Operating voltage determined by housing colour

- Simplifies mating of same voltages

Plug and socket with identical housing design.

- Reduces quantity of components
- Reduces purchasing and storage cost
- Acid resistant housing material Handles, strain relieves available.

CE Marking & UL recognized.

Contacts sized for AWG (American Wire Gauge)

REMA developed high-grade contacts made from pure high conductive Cu-ETP copper with silver plated surface and an anti-friction and tarnish coating ensure.

- Power transition with minimal losses
- Long life

Suitable for crimping

### 1.2.8 Explosion Proof Connector

Electrical connector especially designed for the use in hazardous areas. Product features and advantages:

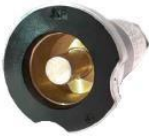

- Approved for Zone 1 (gas) and Zone 21 (dust).
- „Ex“ marking 
- Compliant with the European directive 2014/34/EU „Equipment and protective systems intended for use in potentially explosive atmospheres“ and following standards:
  - EN60079-0: General requirements
  - EN60079-1: Equipment protection by flameproof enclosures „d“
  - EN60079-7: Equipment protection by increased safety „e“
  - EN60079-31: Explosive atmospheres. Equipment dust ignition protection by enclosure „t“
- REMA developed contacts made out of pure high conductive Cu-ETP copper with silver plated surface and an anti-friction and tarnish coating which ensure:
  - a power transition with minimal losses
  - long lifetime
- Polarity and combination protection through contact coding.
- Solder joint for gas tight connection between contact and cable.
- Screw for connecting socket and cable.
- DR E250 ex with a cable  $\geq 50 \text{ mm}^2$  can conduct up to 250A continuously.
- DR E250 ex may be used for lower operating current with smaller cross-section cables.

## 1.3 Schaltbau

### 1.3.1 Euro Din Connectors

## LV Series

The Schaltbau LV Series connectors are especially designed to meet the demands of modern materials handling vehicles. They exceed the requirements of standard EN 1175-1 in many of their features. There is an option for chargers with electrolyte circulation system.

Like all LV Series connectors, also this option is intermateable with all standard commercial charging connectors. Available as 80-, 160-, 320- and 500-amp connectors.

## 1.4 Rebling

### 1.4.1 Double Pole Connectors

Rebling is a manufacturer of connectors located near Philadelphia (US) specialized in high current (100 to 1.000 A) connectors for the past 50 years.

As applications trend toward higher voltages and currents as well as faster charging times, improved features are needed to enable OEMs in those sectors to maintain their competitive edge and reduce their end users' total cost of ownership.

### 1.4.2 Double Pole Quick Disconnect Connectors and Accessories

The bulkhead mounted receptacles and plugs are used in various industries.

At the moment, there is a trend toward higher voltages and currents and faster charging for work trucks, electrified vehicles, auxiliary power, and stationary power applications. It leads to a need for improved features, which enables OEMs in those markets to maintain a competitive edge and reduce their end users' total cost of ownership.

We can offer commercial grade receptacles and sockets with six colour-coded mechanical keying combinations. These keying combinations can be used to differentiate various voltage or current levels to prevent errors by your system assembly, operations, or maintenance personnel.

The Battery Swap Connector is suitable for battery swap and stackable modular power applications. Both high current DC connector halves are bulkhead-mounted and the rugged, high current pin contacts of the male connector act as the guide pins which mate with the socket contacts of the female connector.

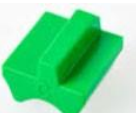

### 1.4.3 Commercial Cable Mounted Plugs

			
Type	7020-T	7020-O	7020-E
EMI-shielded	✗		✓
Keyable	✓		✗
HVIL Switch & Magnet Kit	Optional		
Continuous Rated current (CRC) <i>(per UL1977)</i>	500 A		400 A
Current Profile #2 50% CRC for 60min + 1 sec peak + 50% CRC for 60 min	3000 A		2200 A
Current Profile #3 50% CRC for 60min + 10 sec peak + 50% CRC for 60 min	2000 A		1500 A
Current Profile #4 50% CRC for 60min + 30 sec peak + 50% CRC for 60 min	1500 A		1000 A
Current Profile #5 50% CRC for 60min + 60 sec peak + 50% CRC for 60 min	1000 A		800 A
Rated Voltage	1500 VDC		1000 VDC
Dielectric Withstanding Voltage	5000 VDC		4000 VDC
Max Contact Resistance	70 MicroOhm		
Maximum Wire Size	4/0 AWG (110 mm <sup>2</sup> )		
Maximum Terminal Lug Tongue Width (inches)	1.08 (27,4 mm)		
Maximum Terminal Lug Web Width (inches)	0.45 (11,4 mm)		
Enviromental Sealing	IP55 IP56 (with optional shrink tube)		
Operating Temperature	-40°C to 125°C		-40°C to 90°C
Connection Bolts (inch)	5/16-18

## 1.4.6 Rebling Terminals

### Single pole feed-through terminals

The feed-through terminals are rated from 250 A to 1.000 A and 2.000 V, can take a peak current from

1.500 A to 5.000 A. They are designed for mounting to the steel, aluminum, or plastic panels found in switchgear, panel boards, power cabinets, generator sets, transformers, electrical panel boards, power management modules, battery racks, and control panels.

The terminals are also ideal to use in lithium battery applications: they can be used as external connections in a low voltage battery module or as internal connections in a high voltage battery pack. The brass core of this through panel connector is available with nickel plating for the harsh environments found in outdoor enclosures and remains cool at extreme DC charge or discharge cycles or AC switching rates.

Equipping your design with these single pole, pass-through terminals will enable integrators to incorporate your products into their power conditioning or distribution panel systems.

The double-ended female threaded electrical termination scheme eliminates the shorting hazard of male threaded posts and delivers more than twice the torque strength of a threaded post. This prevents potential damage inflicted by over-zealous end users. Flexible or rigid covers provide touch safety, both before and after cables have been attached to our power pass-through connector.

### Single pole feed-through terminals

							
Type	LFT	SFT	MFT	BFT	BFT	XFT	XFT
Core Material	Brass				Copper	Brass	Copper
Nickel plated	Optional			✔

## 1.5 Ravioli

### 1.5.1 Europa Series

Including the versions 80 A, 160 A, 320 A, this range is in accordance with the current Norms DIN VDE 0623-589, defining unified distances between centers and representing the evolution of the previous DIN Norms.

The series includes 2 versions:

- Shock resistant housing – suitable for all applications requiring high resistance against shocks.
- Acid- proof polymer housing – suitable for applications needing elevated resistance against acid.

The improved version 320A is also available for the cabling of a 95mmq diameter cable, a feature that allows to further enlarge the range of use of the products on different applications.

## 1.7 Mennekes

### 1.7.1 Pro Top CEE Connectors

MENNEKES industrial CEE Connectors according to IEC 60309 standard, are used where high currents have to be transferred safely and economically.

Mennekes Industrial Connectors can reliably be used for:

- Industrial plants
- Chemical and petrochemical industries
- Railway and transport companies
- Shipyards
- Food industry
- Trade fairs and exhibitions
- Data centres
- Trade
- Production industry

Other types of Mennekes range on request.

We can also provide customized cable assemblies with these connectors.

# MENNEKES®

### Ordering Codes

### 1.7.3 Pro Top Socket

#### Pro Top Socket

#### Characteristics

Voltage rating/color housing	110V (Yellow) – 230V (Blue) – 400V (Red) – 500V (Black)
Number of poles	3- / 4- / 5-pole
Current rating	16A / 32A
Hertz	50-60 Hz
Connection	Screw terminals
Contacts	Standard contacts
Protection degree	IP44
Declaration of conformity	VDE – EAC – CQC
Extra features	Gland with sealing – Strain relief – Protection against kinking - Enclosure with thread lock and safety slide

### TERMINAL CABLE "FLEX" – 120 mm<sup>2</sup>

For section 120 mm<sup>2</sup> the connection is executed with ferrule technique

Ordering code	Section (mm <sup>2</sup> )	Length (mm)	Packing unit (pieces)
FEH120-1000	120	1000	15
FEH120-1500	120	1500	10
FEH120-2000	120	2000	10
FEH120-3000	120	3000	8
FEH120-5000	120	5000	5
...	...	...	...

**TERMINAL CABLE FLEX – OTHER VERSIONS\***

Also available with M6 and M8 connections

For example: FES50-1500M8 = Terminal Cable Flex 50/1500 FES - M8

Also available in other lengths

For example: FES50-800 = Terminal Cable Flex 50 mm<sup>2</sup> - 800 mm

Also available in other sections: 10 / 16 / 107 mm<sup>2</sup>

For example: FES16-1000 = Terminal Cable Flex 16 mm<sup>2</sup> - 1000 mm

Can be provided with integrated fuse from 200 A up to 500A

For example: FES50-1000-FUS3 = Cable 50/1000 FES- fuse 300A

Maximum cable section with fuse is 70 mm<sup>2</sup>

Also available in UL94 V0 flamability rating

(V0: burning stops within 10 seconds on a vertical specimen; drips of particles allowed as long as they are not inflamed.)

**TERMINAL CABLE FLEX – “SUNLIGHT”**

- Connector for Sunlight batteries, with slightly bigger inner diameter of the insulation (16,5 mm) to fit the terminal.

- Visual recognition: notch in the outside of the insulation.

### FLEXIBLE CONNECTORS – OTHER VERSIONS\*

Also available with M6 and M8 connections

*For example: FVS70-300M8 = Connector FVS 70-300 - M8 (with M8 connection)*

Also available in other lengths

*For example: FVS25-1000 = Connector Flex 25 mm<sup>2</sup> - 1000 mm*

Also available in other sections: 10 / 16 / 107 mm<sup>2</sup>

*For example: FVS16-250 = Connector Flex 16 mm<sup>2</sup> - 250 mm*

Can be provided with integrated fuse from 200 A up to 500A

*For example: FVS35-350F3A = Connector 35/350 - Fuse 300 A Maximum cable section with fuse is 70 mm<sup>2</sup>*

Also available in UL94 VO flamability rating

(VO: burning stops within 10 seconds on a vertical specimen; drips of particles allowed as long as they are not inflamed.)

M8 - L=500mm</i></p>
	<p><u>Charging Cable for DIN Pole "S Type"</u></p> <ul style="list-style-type: none"> <li>- Cable cross sections: 10 mm<sup>2</sup> and 16 mm<sup>2</sup></li> <li>- Fully insulated</li> <li>- Several lengths possible</li> </ul> <p><i>For example: VSI16-0500 = Charging connector S-type - insulated - 16mm<sup>2</sup> - L=500mm</i></p>
	<p><u>Charging Cable for DIN Pole "T Type"</u></p> <ul style="list-style-type: none"> <li>- Cable cross sections: 10 mm<sup>2</sup> and 16 mm<sup>2</sup></li> <li>- Fully insulated</li> <li>- Several lengths possible</li> </ul> <p><i>For example: VT116-0500 = Charging connector T-type - insulated 16mm<sup>2</sup> - L=500 mm</i></p>

## 2.2 Insulators

### 2.2.1 Surlok Insulators

### 2.2.2 200 Series Lug & Ring Terminal Caps

## 200 Series Lug & Ring Terminal Caps

The 200 Series terminal insulators are designed to protect ring and lug terminals. They are available in sizes from 12 mm up to 34 mm. They are manufactured from PVC, which has a 105°C temperature rating.

TOD= Terminal Outside Diameter

212 Series  
12 mm TOD  
18 – 2 ga cable

214 Series  
14 mm TOD  
18 – 2 ga cable

216 Series  
16 mm TOD  
18 – 2 ga cable

218 Series  
18 mm TOD  
18 – 2 ga cable

220 Series  
20 mm TOD  
18 – 2/0 ga cable

222 Series  
22 mm TOD  
18 – 2/0 ga cable

224 Series  
24 mm TOD  
18 – 2/0 ga cable

226 Series  
26 mm TOD  
18 – 2/0 ga cable

#### The 200 Series Terminal

insulators work with stud and eyelet terminals.

This series can have an extended length for longer terminals, and can be manufactured in 14 colors.

The 200 Series is commonly used on inverters, starters, windlasses, chargers, and other high energy connections.

228 Series  
28 mm TOD  
18 – 2/0 ga cable

230 Series  
30 mm TOD  
18 – 2/0 ga cable

232 Series  
32 mm TOD  
18 – 2/0 ga cable

234 Series  
34 mm TOD  
18 – 2/0 ga cable

8mm<sup>2</sup>  
(8.98mm/0.28") to  
32mm<sup>2</sup>  
(11.93mm/0.51")

**Cable Gauges 2-2/0**  
32mm<sup>2</sup>  
(11.93mm/0.51") to  
62mm<sup>2</sup>  
(18.0mm/0.68")

**Cable Gauges 3/0-4/0**  
81mm<sup>2</sup>  
(18.3mm/0.75") to  
103mm<sup>2</sup>  
(19.8mm/0.81")

### Sample 8 Digit Part Number

### Finding the correct insulation

1. Determine your terminal's outside diameter (A above).
2. Determine your terminal's post height (B above).
3. Determine your terminal's cable entry (D above).

Match your terminal's measurements against the table above to find the correct insulator for your application.

## 2.2.3 Lug & Ring Terminal Insulators

# Lug & Ring Terminal Insulators

A more comprehensive line of insulators, offering a wider variety of lug and ring protection. Our lug and ring insulators can be used with starters, generators, alternators, solenoids, and other devices.

### 258 Series

- Protect large terminal connections from shorts
- Terminal Outside Dia: 2.3"/58.7mm
- Post height: 2.0"/50.8mm
- Inside grip Dia: .65"/16.6mm
- Can accept multiple cables, up to 1/0 ga each

Part#	Cable Entry Size
T1258N9*	Oval, up to 4/0

### 216T Series

- Snap-on insulator, can be removed without cable
- Terminal outside dia: .64"/16.3mm
- Post height: .74"/18.8mm

Part#	Cable Entry Size
T1216T8*	.27"/6.9mm

### 400 Series

- Terminal outside dia: .6"/15.2mm
- Post height: .88"/22.4mm
- Inside grip dia: .44"/11.2mm
- Terminal length: 1.19"/30.3mm

Part#	Cable Entry Size
T1400N7*	.31"/7.9mm
T1400N9*	.44"/11.2mm
T1400E4*	.18"/4.6mm

### 405 Series

- Terminal outside Dia: 1.0"/25.4mm
- Post height: .98"/24.8mm
- Inside grip dia: .50"/12.7mm

NEW:406 Series

Part#	Cable Entry Size
T1405N1*	.13"/3.3mm
T1405N2*	.30"/7.6mm
T1405N9*	.50"/12.7mm
T1406N3*	.16"/4.1mm
T1406N9*	.75"/19mm

### 470 Series

- Terminal outside dia: .85"/21.6mm
- Post height: 1.06"/26.9mm
- Inside grip dia: .63"/15.9mm
- Terminal length: 1.81"/46.0mm

Part#	Cable Entry Size
T1470N9*	.63"/15.9mm

### 485 Series

- Terminal outside dia: .52"/12.9mm
- Post height: .45"/11.4mm
- Inside grip dia: .25"/6.4mm
- Cable entry: .25"/6.4mm

Part#	Cable Entry Size
T1485N9*	.25"/6.4mm

## Lug & Ring Terminal Insulators

### 487 Series

- Terminal Outside Dia: 1.26"/32mm
- Post height: .98"/24.9mm
- Inside grip Dia: 1.0"/25.4mm
- Available in 5 cable entries

NEW:488 Series

Part#	Cable Entry Size
TI487N6*	.5"/12.7mm
TI487N7*	.6"/15.2mm
TI487N8*	.65"/16.5mm
TI487N9*	.75"/19mm
TI488N9*	.87"/22.1mm

### 490 Series

- Used for angled connections
- Terminal outside dia: .75"/19.1mm
- Post height: 1.07"/27.2mm
- Inside grip dia: .50"/12.7mm

Part#	Cable Entry Size
TI490N9*	.5"/12.7mm

### 510 Series

- Terminal outside dia: .5"/12.7mm
- Post height: .8"/20.3mm
- Inside grip dia: .64-11.6mm
- Additional lead times may apply

Part#	Cable Entry Size
TI510N9*	.25"/6.4mm

### 600 Series

- Terminal outside Dia: 1.57"/40mm
- Post height: 1.62"/41.1mm
- Inside grip dia: .65"/16.6mm
- Available in 7 cable entries

Part#	Cable Entry Size
TI600N1*	(1) .31"/7.9mm
TI600N2*	(2) .31"/7.9mm
TI600N3*	(1) .5"/12.7mm
TI600N4*	(2) .5"/12.7mm
TI600N5*	(1) .62"/15.8mm
TI600N6*	(2) .62"/15.8mm
TI600N7*	Oval up to 4/0

### 800 Series

- Terminal outside dia: .85"/21.6mm
- Post height: 1.06"/26.9mm
- Inside grip dia: .63"/15.9mm
- Terminal length: 1.81"/46.0mm

Part#	Cable Entry Size
TI800N4*	.17"/4.3mm
TI800N5*	.21"/5.3mm
TI800N6*	.31"/7.9mm
TI800N9*	.50"/12.7mm

### 801 Series

- Terminal outside dia: .75"/19.1mm
- Post height: 1.03"/26.2mm
- Inside grip dia: .37"/9.4mm
- Cable entry: .31"/7.9mm

Part#	Cable Entry Size
TI801N8*	.31"/7.9mm

\* V02= Red  
V14= Black

## 2.2.4 Battery Terminal Insulators

# Battery Terminal Insulators

The battery insulators are designed for use in marine, commercial, industrial and automotive fields. Our battery terminal insulators are available in various materials and colors.

### 409 Series

- Protect stamped or wrapped battery terminals
- Available in 2 cable entries
- Post height: .83"/21.0mm
- Cable entry: 8 ga -1/0 ga

Part#	Cable Entry Size
TI409N2*	.29"/7.2mm
TI409N3*	.50"/12.7mm

### 415 Series

- Protect tapered style battery posts
- Post height: .74"/18.8mm
- Cable entry: 1/0 ga -2/0 ga
- Available in 4 entry sizes

Part#	Cable Entry Size
TI415N6*	.37"/9.4mm
TI415N7*	.44"/11.2mm
TI415N8*	.50"/12.7mm
TI415N9*	.625"/15.9mm

### 416 Series

- Protect tapered style battery posts
- Post height: .76"/19.3mm
- Inside grip: .63"/16.0mm

Part#	Cable Entry Size
TI416N9*	.63"/16.0mm

### 417 Series

- Snap-on insulator, can be removed without cable
- Post height: .91"/23.1mm
- Inside grip dia: .50"/12.7mm
- Cable entry: 1-1/0 ga

Part#	Cable Entry Size
TI417N9*	.50"/12.7mm

### 430 Series

- Protect tapered style battery posts
- Post height: .83"/21.1mm
- Inside grip dia: .56"/14.2mm
- Cable entry: 2/0-3/0 ga

Part#	Cable Entry Size
TI430N7*	.56"/14.2mm
TI430N8*	.68"/17.3mm

### 455 Series

- Insulator for dual post battery
- Insulator snaps onto cable, and can be fastened with zip-tie
- Can accept multiple cables, of different sizes

Part#	Cable Entry Size
TI455N4*	.4"/10mm
TI455N6*	.5"/12.7mm
TI455N8*	.75"/19.1mm

\* V02= Red  
V14= Black

# Battery Terminal Insulators

## 458 Series

- Insulator for dual post battery
- Attached cover can insulate post when not in use
- Often used with 226 Series Cap

Part#	Cable Entry Size
TI458N0*	n/a

## 500 Series

- Protect angle battery terminals
- Left, right, and dual cable entry
- Available in 2 sizes

Part#	Cable Entry Size
TI500L7*	.5"/12.7mm
TI500L9*	.69"/17.5mm
TI500R7*	.5"/12.7mm
TI500R9*	.69"/17.5mm
TI500D7*	.5"/12.7mm
TI500D9*	.69"/17.5mm

## 553 Series

- Protect side post battery connection
- Available in two sizes

Part#	Cable Entry Size
TI553X6*	.59"/15.0mm
TI553X9*	.90"/22.9mm

## 460 Series

- Protect marine battery, Exide 32
- Tabbed finger grip, for easy removal
- Available for positive and negative
- Allows for secondary battery connection

Part#	Cable Entry Size
TI460N9*	n/a

## 462 Series

- Protect dual-post battery terminals
- Often used in marine industry
- Attached cap covers post when not in use

Part#	Cable Entry Size
TI462N0*	n/a

## 466 Series

- Protect heavy duty battery terminal
- Inside grip dia: .42"/10.7mm
- Cable entry:

Part#	Cable Entry Size
TI466L1_R1*	.13"/3.3mm
TI466L2_R2*	.30"/7.6mm
TI466L3_R3*	.50"/12.7mm
TI466N9*	Oval up to 4/0 ga

## 468 Series

- Protect heavy duty battery terminal
- Accepts right, left, and dual cable
- Snaps onto terminal & cable
- Accepts up to 4/0 ga cables

Part#	Cable Entry Size
TI468L9*	.82"/20.8mm
TI468R9*	.82"/20.8mm
TI468D9*	.82"/20.8mm

\* V02= Red  
V14= Black

# Battery Terminal Insulators

\* V02= Red  
V14= Black

## 740 Series

- Protect marine wing-nut terminals
- Top insulator swivels to accommodate different cable direction
- Several cable entries
- Top insulator offers single, dual,

Red	Black	Cable Entry Size
T13014	T14013	(1).31"/7.9mm
T13024	T14023	(2).31"/7.9mm
T13034	T14033	(1).5"/12.7mm
T13044	T14043	(2).5"/12.7mm
T13054	T14053	(1).62"/15.8mm
T13064	T14063	(2).62"/15.8mm
T13074	T14073	Oval up to 4/0 ga

## 843 Series

- Protect tapered battery post
- Left, right and duals cable entry
- Post height: .79"/20.1mm

Part#	Cable Entry Size
T1843L8*	.44"/11.2mm
T1843L9*	.50"/12.7mm
T1843R8*	.44"/11.2mm
T1843R9*	.50"/12.7mm
T1843D8*	.44"/11.2mm
T1843D9*	.50"/12.7mm

## 900 Series

- Protect tapered battery post
- Left, right and dual cable entry
- Cable entry ring can utilize zip-tie, securing insulator
- Cable entry: up to 3/0 ga (4/0 ga when cut and zip-tied)

Part#	Cable Entry Size
T1900L9*	.63"/16.0mm
T1900R9*	.63"/16.0mm
T1900D9*	.63"/16.0mm

## 975 Series

- Heavy duty cable series
- Cable entry accepts double cable
- Wide cable entry for large cable
- Cable entry: up to 4/0 ga

Part#	Cable Entry Size
T1975D8	.80"/20.3mm

## 976 Series

- Heavy duty cable series
- Triple cable entry permits 3 cables
- Wide cable entry for large cables
- Cable entries can be blocked
- Cable entry: up to 4/0 ga

Part#	Cable Entry Size
T1976N8	.80"/20.3mm

## 2.2.5 L-Post Terminal Insulators

# L-Post Terminal Insulators

This series of insulators is designed to protect L- Post terminals, or Flag terminals.

\* V02= Red  
V14= Black

### 433 Series

- Protect L-Post battery terminals
- Available with left & right entry
- Cable entry: .44"/11.2mm
- Post height: 1.04"/26.4mm

Part#	Cable Entry Size
TI433L5*	.44"/11.2mm
TI433R5*	.44"/11.2mm

### 436 Series

- Protect flat threaded battery posts
- Also protect low-profile L-Post
- Insulator snaps onto cable
- Can be secured to cable with zip tie
- Available without shroud
- Post height: .75"/19.1mm

Part#	Cable Entry Size
TI436N4*	.36"/9.2mm
TI436N5*	.48"/12.2mm
TI436N7*	.64"/16.2mm
TI436S4*	.35"/9.0mm
TI436S5*	.48"/12.2mm

### 437 Series

- Protect L-post battery terminals
- Insulator snaps onto cable
- Can be secured to cable with a zip tie
- Available without shroud
- Post height: 1.28"/32.5mm

Part#	Cable Entry Size
TI437N4*	.36"/9.3mm
TI437N5*	.46"/11.4mm
TI437N7*	.48"/12.3mm
TI437S5*	.40"/10.0mm

### 439 Series

- Protect L-Post battery terminals
- Isolator snaps onto cable
- Can be secured to cable with zip tie
- Available without shroud
- Post height: 1.28"/32.5mm

Part#	Cable Entry Size
TI439N5*	.38"/9.6mm

### 444 Series

- Protect smaller L-Post terminals
- Available with left or right entry
- Post height: 1.2"/30.5mm

Part#	Cable Entry Size
TI444L6*	.30"/7.6mm
TI444R6*	.30"/7.6mm
TI444L8*	.37"/9.4mm
TI444R8*	.37"/9.4mm
TI444L9*	.44"/11.2mm
TI444R9*	.44"/11.2mm

### 799 Series

- Protect smaller L-Post battery terminals
- Left, Right and duals cable entry
- Post height: 1.51"/38.3mm
- Cable entry: .25"/6.4mm

Part#	Cable Entry Size
TI799L9*	.25"/6.4mm
TI799R9*	.25"/6.4mm
TI799D9*	.25"/6.4mm

### 481 Series

- Protect heavy duty L-Post terminals
- Covers exposed terminal base
- Typically used with 433 Series

Part#	Cable Entry Size
TI481N9*	n/a

## 2.2.6 Adapter Terminal Insulators

# Adapter Terminal Insulators

Adapter Terminal Insulators are designed to protect combination connections, where cables may be detached from the battery terminal.

### 419 Series

- Protect multiple cable [terminals](#)
- Insulator can slide back, to access cable [connections](#)
- Cable Entry: .53"/13.8mm

Part#	Cable Entry Size
TI419N9*	Oval up to 1/0 ga

### 421 Series

- Protect offset battery [terminals](#)
- Use with negative terminal, usually left cable [entry](#)
- Insulator slides over terminal
- Cable entry: .60"/15.2mm

Part#	Cable Entry Size
TI421N9	.60"/15.2mm

### 422 Series

- Protect offset battery [terminals](#)
- Use with positive terminal, usually right cable entry
- Insulator slides over terminal
- Cable Entry: .60"/15.2mm

Part#	Cable Entry Size
TI422 N9	.60"/15.2mm

### 456 Series

- Protect marine battery [terminals](#)
- Works with bolt-on/ wing-nut type battery terminals
- Accepts single or multiple [cables](#)

Part#	Cable Entry Size
TI456N9*	Oval up to 4/0 ga

### 457 Series

- Protect marine battery [terminals](#)
- Works with bolt-on/ wing-nut type battery terminals
- Single cable entry, in 3 sizes

Part#	Cable Entry Size
TI457N1*	.11"/2.8mm
TI457N2*	.32"/8.1mm
TI457N3*	.55"/14.0mm

\* V02= Red  
V14= Black

## Adapter Terminal Insulators

### 451 Series

- Protect multiple cable [terminals](#)
- Insulator snaps onto cables and can be removed [easily](#)
- Cable entry: .53"/13.8mm

Part#	Cable Entry Size
T1451N9*	Open up to 1/0 ga

### 453 Series

- Protect offset battery terminal, usually left cable [entry](#)
- Insulator snaps onto cable
- Cable entry: .50"/12.7mm

Part#	Cable Entry Size
T1453L9 V14	Open up to 1/0 ga
T1453R9 V14	Open up to 1/0 ga
T1453D9 V14	Open up to 1/0 ga

### 454 Series

- Protect offset battery [terminals](#)
- Use with positive terminal, usually right cable [entry](#)
- Insulator slides on to cable
- Cable Entry: .50"/12.7mm

Part#	Cable Entry Size
T145 L9 V02	Open up to 1/0 ga
T145 R9 V02	Open up to 1/0 ga
T145 D9 V02	Open up to 1/0 ga

### 776 Series

- Protect heavy duty battery [terminals](#)
- Waterproof [insulator/cover kit](#)
- Prevents electrical current flow when submerged in salt [water](#)
- Includes 479 Series [disc](#)

Part#	Cable Entry Size
T1776N7*	.42"/10.7mm
T1776N8*	.62"/15.8mm
T1776N9*	.82"/20.8mm

### 70480 Series

- Corrosion prevention kit for 8DA & 4DA batteries
- Cable locations can be [changed](#)
- Includes all necessary components: bases, covers, terminals, sleeves, plugs, [gel](#)
- For use with 1/0 ga – 4/0 ga cables

Part#	Cable Entry Size
70480*	Min: .5"/12.7mm Max: .87"/22.1mm

\* V02= Red  
V14= Black

## 2.2.7 Specialty Terminal Insulators

# Specialty Terminal Insulators

### 550 Series

- Covers engine [sensors](#)
- Generous height and downward wire exit
- Retainer lip keeps cover in [place](#)
- Wall thickness: ~1mm
- Available in 2 cable entries

Part#	Cable Entry Size
T1550N6*	.25"/6.4mm
T1550N9*	.38"/9.5mm

### 560 Series

- Covers engine [sensors](#)
- Generous height and downward wire exit
- Retainer lip keeps cover in [place](#)
- Wall thickness: ~2.8mm

Part#	Cable Entry Size
T1560N4*	.25"/6.4mm

### 621 Series

- Small straight sensor cover
- Molded in ring allows for greater [strength](#)
- Typically used with oil and water temperature sensors

Part#	Cable Entry Size
T1621N9*	.25"/6.4mm

### 725 Series

- Accepts terminals up to [24mm](#)
- Tunnel cap allows for various cable entry sizes and [shapes](#)
- Insulator can be zip-tied to [cable](#)
- Maximum terminal OD: .94"/24mm
- Maximum terminal height: .99"/25.3mm
- Available in halogen-free material

Part#	Cable Entry Size
T1224T9*	Various Inserts

### 729 Series

- Accepts terminals up to [24mm](#)
- Tunnel cap allows for various cable entry sizes and [shapes](#)
- Insulator can be zip-tied to [cable](#)
- Maximum terminal OD: .11"/28mm
- Maximum terminal height: 1.2"/30.7mm
- Available in halogen-free material

Part#	Cable Entry Size
T1228T9	Various inserts

### 735 Series

- Accepts terminals up to [24mm](#)
- Tunnel cap allows for various cable entry sizes and [shapes](#)
- Insulator can be zip-tied to [cable](#)
- Maximum terminal OD: .152"/34mm
- Maximum terminal height: 1.3"/38.6mm
- Available in halogen-free material

Part#	Cable Entry Size
T1234T9*	Various Inserts

\* V02= Red  
V14= Black

### 3. Battery Management Systems

#### 3.1 Philadelphia Scientific

##### 3.1.1 Blinky water level sensors

Expensive assets are almost always monitored to record how they are being used. While a forklift truck has an hour meter and a service record to help estimate the usage level, the monitoring of the battery is often overlooked. This leads to batteries becoming over-discharged, not watered, and ultimately dead long before they're supposed to be. The range of battery monitors gives you both visual and audio cues to make sure essential maintenance is carried out, and you can even record and transmit a wide range of data points giving you key information on how individual batteries are performing.

The Blinky™ range of battery water level monitors (BWM) feature patented UL Classified® technology that dramatically improves battery maintenance by intelligently alerting personnel when a battery needs water. The new super bright LED light indicator and audible alarm (Pro unit) eliminate operator error by clearly indicating when a battery has sufficient electrolyte. Philadelphia Scientific has three tiers of battery water level monitors to suit all applications and budgets:

▲ Basic Blinky is the entry level battery water level monitor. It has provided decades of protection against battery dry out and remains the industry leading low-cost battery monitor.

▲ Smart Blinky is the mid-range battery water level monitor and offers comprehensive functionality for great value. The unique SmartDelay feature provides 100% confidence of a true indication.

▲ Smart Blinky Pro adds an audible alarm and fool proof installation to SmartDelay, making SmartBlinky Pro the gold standard for battery monitors.

### Advantages

	Patented Smart Sensing Technology: The Blinky eliminates false indication. This maximizes watering intervals to prevent unnecessary watering or dry out and minimizes costly boil overs.
	Battery-friendly probe: The probe is lead so there is never a fear of poisoning the cell into which it is placed.
	Engineered to be tough: The Blinky's are built to withstand the harsh environment of industrial battery applications. All materials are resistant to corrosion and the low profile design protects against damage.
	Inexpensive and cost effective: Over a battery lifetime, the Blinky battery watering monitor saves a surprising amount of time - or labour cost - and delivers a rapid return on investment.
	Fits almost all batteries: Blinky monitors are available with many standard probe lengths, and can also be easily trimmed to any custom length.

### ? Extra info ?

Reverse polarity protection	Connecting SmartBlinky 'the wrong way round' will not damage it.
SmartDelay	The SmartDELAY optimises battery filling whilst preventing boil-over. The electrolyte level in a battery can rise and fall several times a day, with SmartDELAY the Smart Blinky's LED only turns red once the electrolyte level has been low for over 24 hours, reducing the risk of incorrect topping and reducing the topping frequency.
Days without water indicator	SmartBEEP - The Smart Blinky Pro has a unique beeper that will help you identify a battery that needs water even if you can't see it. The frequency of the beep indicates for how many days the electrolyte has been low.
Anycell installation	Patented universal voltage and polarity means the installation is simple and cannot damage the device. ANYCELL technology means it is almost impossible to put the probe in the wrong location.
Forgiveness Zone	This feature provides for more tolerance of installation errors, reducing the risk of damaging the monitors during installation. If the unit is installed incorrectly within the forgiveness zone the LED will not come on but the unit is not permanently damaged and can be corrected.

### 3.1.2 eGO! Battery Life Monitor

#### BATTERY MONITORING

Expensive assets are almost always monitored to record how they are being used. While a forklift truck has an hour meter and a service record to help estimate the usage level, the monitoring of the battery is often overlooked. This leads to batteries becoming over-discharged, not watered and ultimately dead long before they're supposed to be. A battery life monitor gives you visual cues to make sure essential maintenance is carried out, and you can even record and transmit a wide range of data points giving you key information on how individual batteries are performing.

The eGO!c battery life monitor is an advanced battery life monitor, turning any lead-acid battery into a smart battery. Recording over 256,000 data samples, across 28 fields, covering 23 separate performance indicators, the eGO!c is an all-encompassing intelligence system that delivers the data that is locked away within your batteries.

The wide range of metrics recorded by the eGO!c can be used to improve the overall performance of a battery fleet:

- Improve maintenance procedures.
- Increase run-time and reduce costs.
- Assign accountability for battery abuse.
- Quickly review the data for your entire fleet.
- Identify improvements to maintenance procedures across multiple sites.
- Pro-actively monitor to track improvements

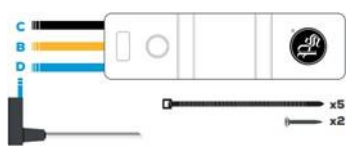

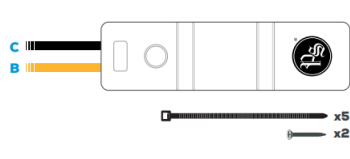

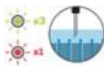

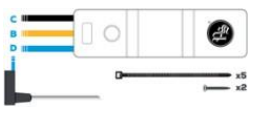

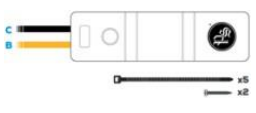

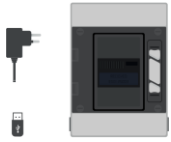

Operating voltage	12 V

### DATA YOU CAN USE

	Electrolyte Levels	The eGOc alerts you when the battery needs water (Flooded version).
	Temperature Levels	Hot running or charging temperatures are a telltale sign that something is wrong.
	Normal Cycles	When a battery is charged, used and discharged, this is classed as a normal usage cycle.
	Opportunity Cycles	If a battery is charged multiple times during a work cycle this reduces overall life expectancy.
	Abuse Cycles	Abuse cycles are another big killer of batteries. The eGOc tracks it so you can amend working practices and maintenance.
	Work Time	You can see exactly how long each battery has worked for.
	Rest Time	Reporting in conjunction with Work Time, this shows how long a battery has stood unused with charge.
	Charge Time	The amount of time a battery has been on charge can indicate a whole range of issues with capacity.
	Cool Down Time	Using a battery that hasn't cooled down enough drastically impacts performance, the eGOc tracks it so you can change practices.
	Life Used	Calculating the average lifespan of a battery using the data captured through the eGOc we can show current life used.
	Life Remaining	Working in with Life Used, the life remaining report allows you to effectively plan in replacing batteries and assets.
	Data Received	There can be tracked when exactly the last upload was received online.

**DATA POINTS AND RECORDED METRICS**

Download date	Date of download
eGOc Serial number	Serial number issued by PS identifying the eGOc. This is located on top of the eGOc.
Cell voltage at download	This is the average 'volts per cell' of the battery.
Temperature download	Specific temperature at download.
Electrolyte status at download	OK = electrolyte level is correct Fill soon = electrolyte level is getting low Fill now = electrolyte level is low, battery needs filling
Number of normal charge cycles	The number of times the battery is discharged and then charged with a normal termination.
Hours of opportunity charge	Quantity of hours of charge when the charge is ended before having reached the end of normal charging.
Estimated total cycles	An estimation of the total quantity of cycles including any opportunity charging that may have occurred.
Lifetime average cycles per day	This is the average number of cycles per day since the eGOc was installed.
Last 30 days average cycles per day	The average number of cycles per day for the last 30 days.
Total connected days	How many days the eGOc has been connected to the battery.
Number of connections	The number of times the eGOc has been disconnected and reconnected.
Days since last connection	Number of days since the last time the eGOc was connected.
Lifetime work hours	The number of hours of discharge, recorded from the first time the eGOc was installed.
Lifetime rest hours	The number of hours the battery is not on charge or being discharged, recorded from the first time the eGOc was installed.
Last cycle complete hours between charges	The number of hours between the end of the last charge and the beginning of the next charge.
Last cycle work time	The number of hours the battery is being discharged during the last cycle.
Last cycle rest time	The number of hours the battery is not being discharged during the last cycle.
Last cycle charge time	The number of hours during which the battery is on charge during the last cycle.
Maximum temperature during last cycle	Highest recorded temperature during last cycle.
Maximum voltage during last cycle	Highest recorded voltage during last cycle.
Minimum voltage during last cycle	Lowest recorded voltage during last cycle.
Lifetime average temperature	The average temperature recorded since the first installation of the eGOc.
Lifetime max temperature	Highest recorded temperature since the eGOc was installed.
Days since connection when maximum temp occurred	The number of days between the initial installation up until the highest temperature was recorded.

Last 30 days average temperature	The average temperature recorded for the preceding 30 days.
Last 24 hours average temperature	The average temperature recorded for the preceding 24 hours.
Cumulative hours of high temperature	The number of hours where the temperature exceeds 40 degrees Celsius (flooded) and 37 degrees Celsius (VRLA).
Lifetime max voltage	The highest voltage recorded since the eGOc was first installed.
Days since connection when maximum voltage occurred	The number of days between the initial installation up until the day the maximum voltage occurred.
Lifetime minimum voltage	The lowest voltage recorded since the eGOc was first installed.
Days since connection when minimum voltage occurred	The number of days between the initial installation up until the day the minimum voltage occurred.
Hours of over discharge	The number of hours that the average cell voltage is below the pre-defined voltage.
Total number of days without water	The number of days the electrolyte level is below the level of the probe.
Longest period without water	The longest period in days that the electrolyte level has been below the level of the probe.
Days without water at download	The number of days the electrolyte level is below the level of the probe at the time of download.

### Advantages

	Quick and easy to install: Only three leads: two to connect power and one for the electrolyte probe. Complete the fields in the eGOcTools app with the battery information and press send.
	Easy to use: Simply log onto <a href="http://www.batterymanagement.net">www.batterymanagement.net</a> to view your battery information.
	Real-time email alerts can be configured to each site's requirements across multiple parameters (with CloudLink and an Internet connection).
	Offers battery replacement date predictions.
	Multiple user profiles can be provided depending on needs and access permissions. From the administrator who has full access, through management tiers, to a user who can only view reports.
	The batterymanagement.net API can be integrated into many third party online reports such as forklift management systems.
	Multi-language reports are available in English, Korean, Japanese, Spanish, French, German, Dutch, Italian, Portuguese, Serbian, Slovak, Czech, Hungarian.
	When using the iTAG system and reports, batterymanagement.net provides in-depth battery asset records, including condition histories and service records which complement the eGOc reports.

### ? Extra info ?

Reverse Polarity Protection	Connecting 'the wrong way round' will not damage it.
SmartDelay	The SmartDELAY optimises battery filling whilst preventing boil-over. The electrolyte level in a battery can rise and fall several times a day, with SmartDELAY the LED only turns red once the electrolyte level has been low for over 24 hours (5 day optional), reducing the risk of incorrect topping and reducing the topping frequency.
SmartSense	Programme that confirms electrolyte level is below the probe.

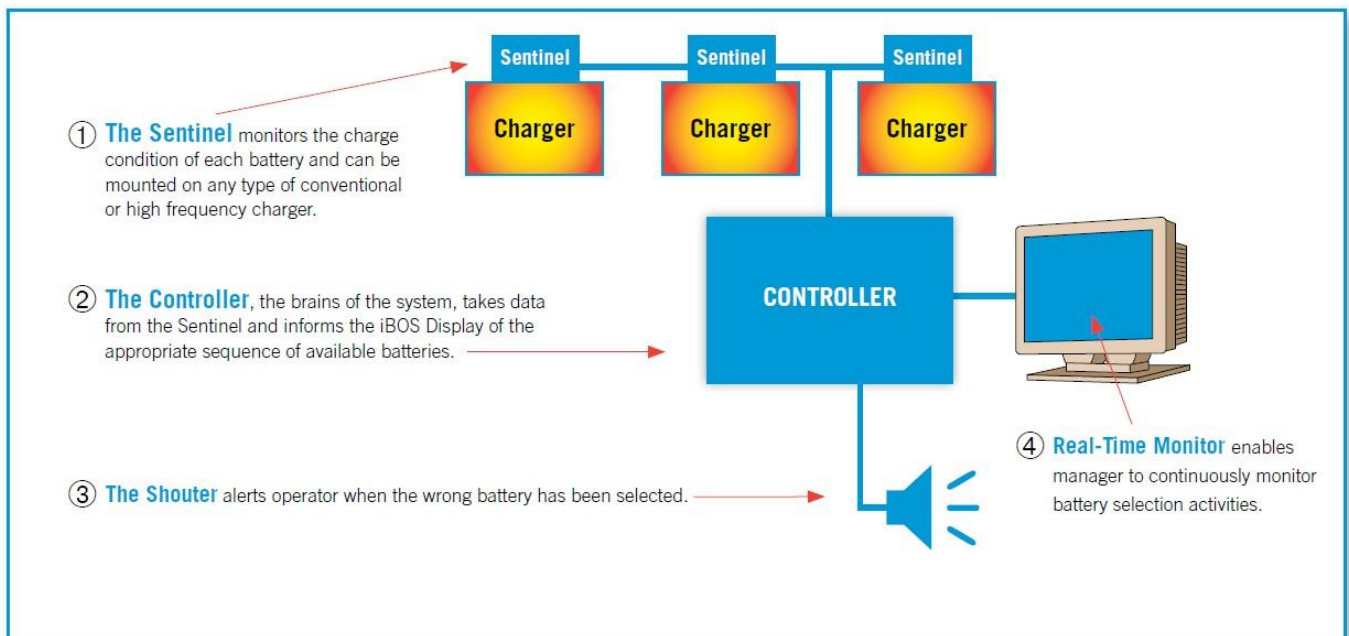

### 3.1.3 iBOS Management System

Battery room management that extends battery life and effectiveness.

Site tests have shown that if battery selection is left to an operator, 30% of the batteries will be underutilized and 20% will be overused. The result: uneven battery usage, premature battery failure and lost productivity.

The iBOS® (Intelligent Battery Organizing System) with Real-Time Monitor enables the most cost-effective utilization of your pool of batteries. It ensures proper battery rotation, which is critical to long battery life and maximum run time. iBOS monitors all batteries in a pool and eliminates operator judgment in battery selection by determining which battery has had the longest cooling time since charging. Once charged, each battery is placed in queue. The simple-to-use iBOS “read and react” Display then tells the operator which battery to take. An audible alarm called the “Shouter” alerts the operator when the wrong battery is taken. And the Real-Time Monitor provides all the information needed to efficiently manage the battery pool.

How it works:

With the iBOS Real-Time Monitor, a battery room manager can use an on-site computer to continuously monitor battery selection activities. It provides information in an easy-to-understand manner, signalling the manager when one of our five alert conditions is triggered:

1. Battery availability low – when no charged batteries (or any number a manager chooses) are available.
2. Mis pick – when an operator chooses the wrong battery or if the battery picked is still charging.
3. Short charge duration – when a battery takes less than three hours (or any duration the manager chooses) to charge. This may indicate a low capacity battery or that an operator is returning a battery for recharging too soon.
4. Charger no start – when a charger does not turn on when a battery is connected – sometimes due to an over-discharged battery.
5. Cool down time – when a battery is picked before a pre-selected length of cool-down time, potentially reducing the life of the battery

## iBOS Features

- Easy-to-use “read and react” system.
- Large scrolling display tells forklift operators the “correct” battery to pick next.

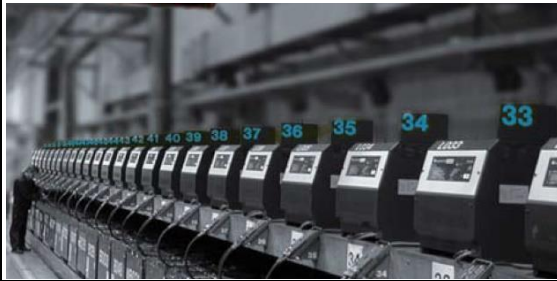

Displays are available in multiple languages.

- Shouter sounds an alarm when operator takes a battery that is not fully charged, reducing mis picks.
- Real-Time Monitor provides all the information needed to efficiently manage the battery pool.
- Works with virtually any charger.

## iBOS Benefits

- Promotes longer battery run time and life through uniform usage.
- Improves operator productivity.
- Identifies faulty equipment.
- Helps managers decide if there are too many or too few batteries in the pool.

## Parts included in the standard iBOS kits

<b>iBOS Basic Kit</b>		
<b>Picture</b>	<b>Ordering code</b>	<b>Description</b>
	BOS-CB6400EU	iBOS Controller, iBOS 6 Basic, 50-Chargers 1-Pool EU
	BOS-B-PCEU	IEC Power cable
	BOS-143	iBOS Extension Cable Lead & Coupler RJ12 L=8,0m/25ft <ul style="list-style-type: none"> <li>• 2 pieces included in set</li> </ul>
	BOS-SU6000R	iBOS Sentinel 6 c/w QT & Report <ul style="list-style-type: none"> <li>• RJ12 Cable L=2,0m included</li> <li>• Quantity depends on the number of chargers (maximum 50)</li> </ul>

### iBOS Plus Kit

Picture	Ordering code	Description
	BOS-CB6500EU	iBOS Controller, iBOS 6 Plus, 100-Chargers, 9-Pools EU
	BOS-B-PCEU	IEC Power cable • 2 pieces (for UPS and iBOS)
	<i>Not available separately</i>	iBOS Extension Cable Lead & Coupler RJ12 L=15m/50ft • 4 pieces included in set
	BOS-200	iBOS Extension CAT6 Cable & Coupler RJ45 L=15m/50ft
	BOS-SU6000R	iBOS Sentinel 6 c/w QT & Report • RJ12 Cable L=2,0m included • Quantity depends on the number of chargers (maximum 100)
	BOS-511	Certa UPS C60/800

### iBOS Pro Kit

Picture	Ordering code	Description
	BOS-CB6700EU	iBOS Controller, iBOS 6 Pro, 200-Charger, 9-Pools EU
	<i>Not available separately</i>	Mounting bracket for IBOS Pro controller
	BOS-B-PCEU	IEC Power cable • 2 pieces (for UPS and iBOS)
	<i>Not available separately</i>	iBOS Extension Cable Lead & Coupler RJ12 L=15m/50ft • 8 pieces included in set
	BOS-200	iBOS Extension CAT6 Cable & Coupler RJ45 L=15m/50ft
	BOS-231	5-way adapter for TV driver connection
	BOS-SU6000R	iBOS Sentinel 6 c/w QT & Report • RJ12 Cable L=2,0m included • Quantity depends on the number of chargers (maximum 200)
	BOS-511	Certa UPS C60/800

## iBOS Options

Picture	Ordering code	Description
	BOS-143	iBOS Extension Cable Lead & Coupler RJ12 L=8m/25ft <ul style="list-style-type: none"> <li>• Included in iBOS Basic</li> </ul>
	<i>Not available separately</i>	iBOS Extension Cable Lead & Coupler RJ12 L=15m/50ft <ul style="list-style-type: none"> <li>• Included in iBOS Plus and Pro</li> </ul>
	BOS-161	iBOS Extension Cable Lead & Coupler RJ12 L=30m/100ft
	BOS-224	iBOS Sentinel Mounting Bracket, Galv. Steel
	BOS-226	iBOS Sentinel Cable Lead RJ12 L=1.0m/3ft Type 'B'
	BOS-227	iBOS Sentinel Cable Lead RJ12 L=1.5m/5ft Type 'B'
	BOS-228	iBOS Sentinel Cable Lead RJ12 L=2.0m/7ft Type 'B' <ul style="list-style-type: none"> <li>• Standard length – included in Sentinel</li> </ul>
	BOS-229	iBOS Sentinel Cable Lead RJ12 L=3.0m/10ft Type 'B'
	HDMI-2PS	HDMI splitter cable - 2 ports (Full HD, Passive)
For other options or extra features, please contact us		

## iBOS TV Driver – optional for iBOS Plus and Pro

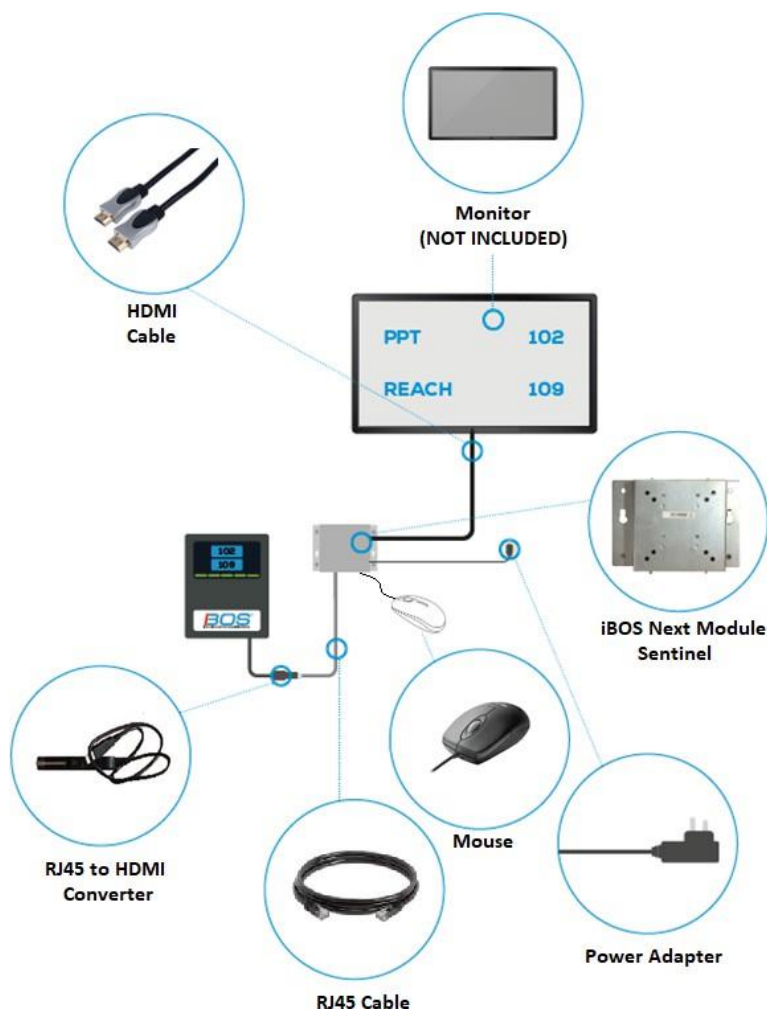

Picture	Ordering code	Description
	BOS-HDS6N2	iBOS HD Next Module Sentinel 6 PLUS Panel (w/o TV Screen)*
	BOS-HDS6N	iBOS HD Next Module Sentinel 6 PRO Panel (w/o TV Screen)*

\*This set includes: the HD Next Module Sentinel, Power adapter, Mouse, HDMI Cable, RJ45 Cable and RJ45 to HDMI Converter.

\*RJ45 to HDMI Converter only applicable for iBOS Plus.

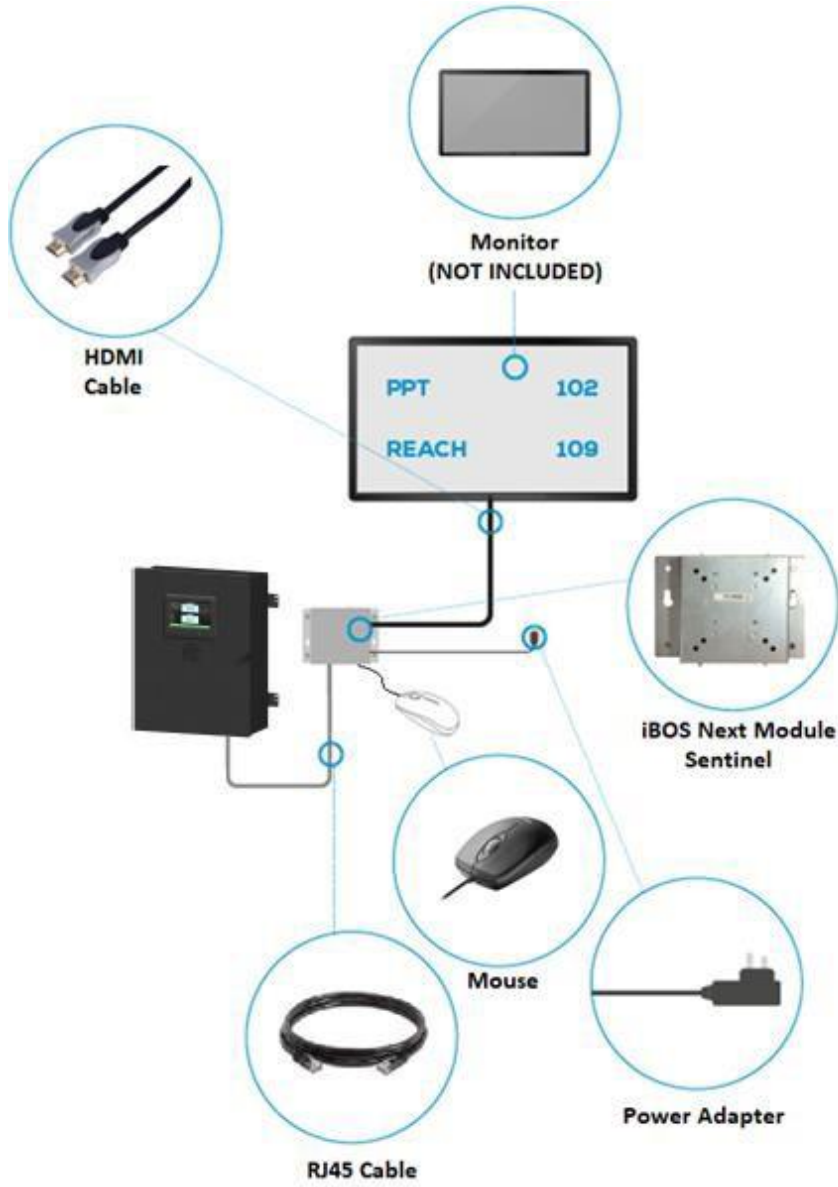

\*Monitor not included. Any TV-screen or monitor with HDMI-port can be used.

### Set-up TV-driver for iBOS PLUS

### Set-up TV-driver for iBOS Pro

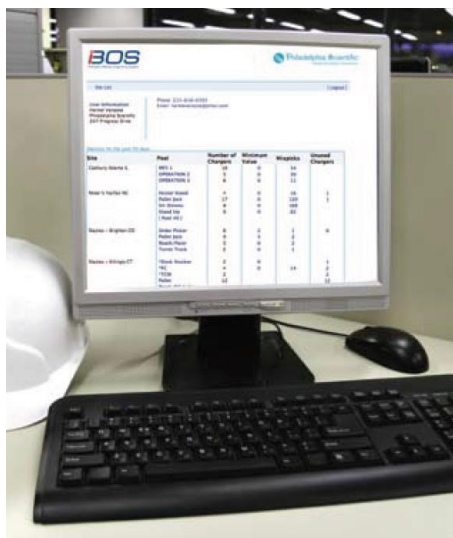

## Sentinel LED status

Picture	Description
	<p><b>Green</b> LED = Communication Status:</p> <p>A solid green light indicates a good connection to the Controller. All Sentinels™ should have a solid green light. Upon initial connection, the green light will flash fast, then slower, before settling at solid green. If the green light remains flashing fast, check the wire connection to the Sentinel™.</p>
	<p><b>Amber</b> LED = Charging Status:</p> <p>When the amber light is on, the battery is connected. If the amber light does not turn on, check the Flexi-Tap connections to ensure that the pins have fully penetrated the cables.</p>
	<p><b>Blue</b> LED = Next Battery to Pick:</p> <p>A slow, blue flashing light indicated the next battery to pick in that pool. If you do not want to use the blue light as a pick light indicator, it can be turned off in the settings panel.</p>

## iBOS World Web Service

- Enables the remote review and analysis of battery room performance — at a single facility or at multiple sites.
- Identifies faulty chargers and other equipment problems that might otherwise go unnoticed.
- Avoids disruptions to operations caused by too few batteries.
- Verifies optimum battery to truck ratio.
- Management reports give information on asset utilization and availability and proper battery rotation.
- Data is displayed in time increments specified by the user.
- Enables the analysis of long-term trends and seasonal battery usage.
- Supports energy management by facilitating off-peak charging.
- Allows management to benchmark a facility and compare its performance to other facilities.
- Access to the data is limited and controlled.
- 5 years of available data.
- Any Web browser can be used to access data.
- Saves money by helping avoid the purchase of unneeded batteries.
- Helps establish correct number of batteries needed and provides independent justification for battery and charger purchases.
- With the iBOS World™ Web Service ([www.iBOSWorld.com](http://www.iBOSWorld.com)), management can optimize assets by analysing battery performance and creating reports remotely on the Internet.
- iBOS World Web Service subscriptions are available in one-, three- and five-year plans.

## 3.2 Abertax Technologies

### 3.2.1 Capacitive Level Sensor

#### CLS Capacitive Battery

#### Electrolyte Level Sensor for all flooded lead acid batteries

##### Description

The New ABERTAX® CLS Capacitive Battery Electrolyte Level Sensor uses Patented Technology which allows numerous advantages over all other sensors on the market. Green light indicates that the electrolyte is at or above the specified minimum level. Flashing red indicates that the electrolyte is below minimum.

##### Product and Safety Features

- Patented Technology that eliminates electrolytic corrosion between the probe and cell plates
- Easiest installation in the shortest time by qualified service personnel
- Allows installation in any of the 6 cells supplying the sensor
- Supply wires are fed from opposite ends of the sensor to eliminate wire loops and allow maximum isolation
- Protected against transient voltages
- Protected against over-current in all three possible paths
- Sensor not damaged by wrong polarity connection
- Protected against electro-magnetic interference
- Patented connector that ensures a perfect battery seal
- Connector designed for Bolted type of Batteries (WLW\*); other connectors for Welded type also available
- Acid-resistant body with grommets to ensure a perfect seal between the wire and housing
- Sensor probe with Gauge Guard to protect probe from touching the separators

\*WLW - Washer with leading Wire

## Installation on battery

For correct Sensor type refer to selection table on left.  
 For Installation Instructions see overleaf

## Mechanical construction

The New Patented Abertax<sup>®</sup> CLS (Capacitive Level Sensor) has an acid-resistant housing with grommets for a perfect seal between the wire and housing. To ensure an accurate installation of the Sensor, only the special Abertax drill should be used.

The Gauge Guard has three functions:

- Protection of the Probe from touching the plate separators in the Battery.
- Provision of a good seal between the Probe and the Battery lid.
- Ensuring the correct length of the Sensor probe.

The Probe can be installed in any cell between the supply Voltage Cells.

## Technical specifications

Supply voltage	12V (6 x 2V cells)
Current consumption	<20mA
Operational temperature range	-25...+80°C

## Available Sensor Types

Example:

CS-GG-127-SS-4

Capacitive Level Sensor: \_\_\_\_\_

Probe: \_\_\_\_\_

GG Sensor or probe with Gauge Guard

ST Sensor or probe without Gauge Guard (with o-ring)

Probe Length: \_\_\_\_\_

127 Long probe 127 mm

077 Standard probe 77 mm

Sensor: \_\_\_\_\_

SS Standard sensor

BC Sensor for mounting between cells

CT Sensor for mounting on cable (with strapping bracket)

MLBC Multilayer sensor with external housing between cells

MLCT Multilayer sensor with external housing on cable (with strapping bracket)

DB Sensor with remote led and lens mounted in dashboard

CM Sensor with remote led mounting between cables

Connection: \_\_\_\_\_

4 Terminal connector

S Standard connection

1 WLW connector

### 3.2.2 BMS

#### BMS Battery Monitoring SYSTEM

#### Description

The BMS is another quality product from Abertax Technologies. It gives essential battery information i.e. full voltage, half voltage, temperature and electrolyte level. It stores the number of charge/discharge cycles, temperature, electrolyte low level duration and deep discharge duration.

The sensor has 3 LEDs, which indicate the following:

- Flashing green: when powered and no warnings
- Flashing red: electrolyte level below specified minimum for flooded batteries and low voltage for maintenance free batteries
- Flashing yellow: battery temperature above 50°C

## Product and Safety Features

- Easiest sensor to install in shortest time by personnel familiar with servicing and/or use of batteries
- Patented connector that ensures a perfect battery seal
- Not affected by current due to parasitic resistance
- Not affected by wrong polarity connection
- Acid resistant
- Level probe with Gauge Guard (for flooded batteries)
- Protected against electro-magnetic interference
- Not affected by inductive currents

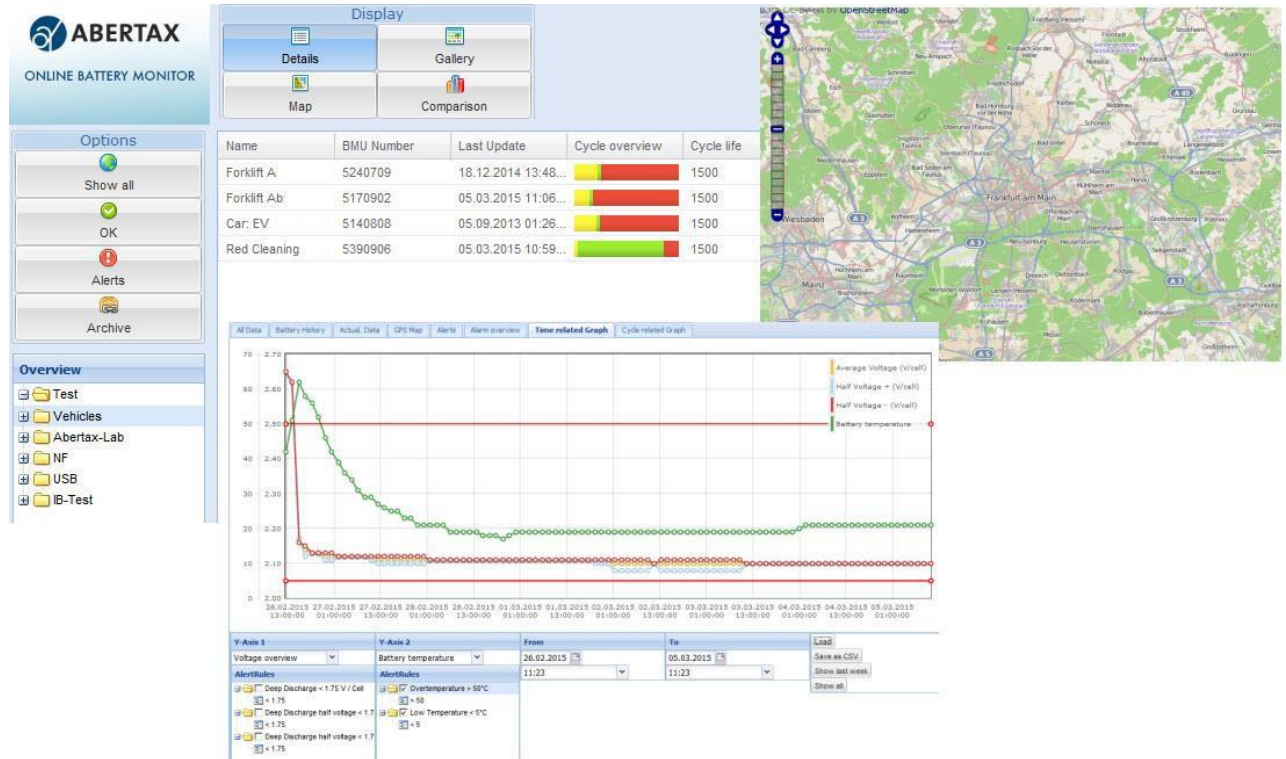

## Installation

## Software

Stored data can be downloaded for evaluation. The available software will display: on time, discharge time, number of charge and discharge events, low acid level time, over temperature time, battery/ambient temperature and full/half battery voltage. Data can be downloaded via cable or wireless (Bluetooth).

## Mechanical Construction

Abertax sensors have an acid resistant housing. It features an additional cable for communication with the computer. For flooded batteries probe and Gauge Guard have to be ordered to length. The Abertax drill should be used for drilling the Gauge Guard hole.

## Technical Specifications

Supply voltage	8V – 130V
Current consumption	<33mA
Operational temperature range	-25...+80°C
Serial Interface	9.6k Band, 3.3V level
Temperature set point	50)C
Weight	185gr

## Available Models

Example:

**BMS-G127-M04-24**

**Battery Management Unit/ Battery Monitoring Sensor:** \_\_\_\_\_

BMS Battery Monitoring Sensor

**Probe:** \_\_\_\_\_

G Probe with Gauge Guard

**Probe Length:** \_\_\_\_\_

77 Short probe 77 mm

127 Long probe 127 mm

**Connection:** \_\_\_\_\_

M04 Terminal connector

WLW WLW connector

S Standard connector

**Voltage:** \_\_\_\_\_

24 24V

36 36V

48 48V

72 72V

80 80V

96 96V

### 3.2.3 e<sup>2</sup>BMS

#### e<sup>2</sup>BMS Battery Monitoring SYSTEM

#### Description

e<sup>2</sup>BMS is a state-of-the-art wireless technology for operation cost-cutting and providing a quality service. Opens new opportunities in material handling applications, saving up to 20% in costs.

#### Product and Safety Features

Easy to install in shortest time by personnel familiar with servicing and/or use of batteries

- Does not require personnel in the field to retrieve data (Online version)
- Wide operational voltage range
- Current measurement (Option)
- Two voltage inputs, string and half voltage
- Two temperature measurements
- Electrolyte level sensing
- Uploading of logged data to server via GPRS/3G (Online version)
- RF communication on site with other nearby modules & sensors
- Accessed using Internet Browser (Internet Explorer, Safari, Chrome, Firefox) on any internet enable device (PC, Laptop, Smartphone, Tablet) (Online version)
- No software installation required
- Different access levels (RF-USB, RF-WIFI, RF-LAN, RF-CAN)
- Display location of e<sup>2</sup> (Online version)

## Installation

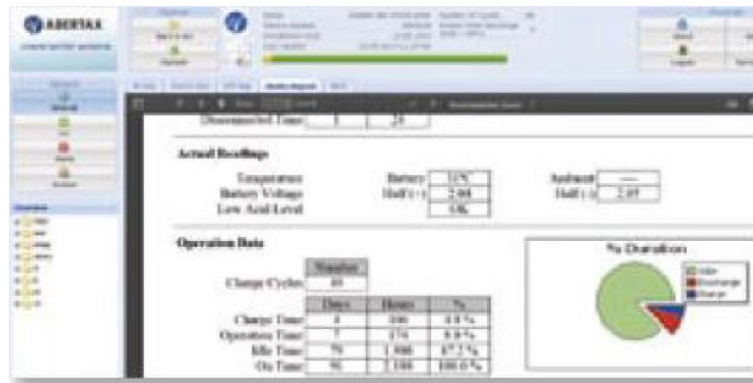

## OBM Web Portal – Online Monitoring of Data

- Gallery display shows immediate indication of the status of each battery in the fleet. Systems that are marked red show that an alarm has occurred.
- Data samples such as voltage, low acid level, temperature, etc., are displayed in the form of a table. Data can be exported and opened by a spreadsheet program.
- Variable sampling rate as defined by user.
- Graphs of any two of the logged data, e.g. temperature and voltage (including + and - half voltage)

- Display live Alarms of any battery parameter/condition e.g. low electrolyte level, high temperature, depth of discharge, etc.-  
Rectification of any problems before damage is done to the battery.
- Alarm notification via email.
- Online report generation.

### 3.3 Curtis

#### 3.3.1 Battery Discharge Indicators

##### **BATTERY DISCHARGE CONTROLLER – TYPE 900**

- Diameter: 52 mm
- Without lock-out\*
- Product Code: BDC24 (24V) and BDC48 (48V) and BDC80 (80V)

##### **BATTERY DISCHARGE CONTROLLER – TYPE 901**

- Diameter: 52 mm
- With lock-out\*
- Product Code: BDC24-L (24V) and BDC48-L (48V) and BDC80-L (80V)

(\*) Lock-Out function: Shuts down the lift-function at low battery level, so the truck can still drive to the charging station.

## 3.4 Frötek

### 3.4.1 Level Indicators

The FRÖTEK Level Indicator is a product intended to indicate the battery electrolyte level of lead-acid batteries during operation. Basically, it consists of a housing with an optical alarm system onto which a long bar with external insulation is mounted in such a way that this bar, if inserted through a battery lid, touches the electrolyte. Furthermore, at least one or, depending on the model concerned, several cables for voltage supply or signal transmission are connected to the housing.

#### Functions and Features:

**Basic Functions:** When the FLI has contact with the electrolyte, it flashes green.

When it has no contact, the signal will go out in case of the basic-model, or, in case of the Advanced Ad-model, a red flashing signal will appear.

**Level verification:** Prior to each flashing of the LED, the FLI will perform a level check. In order to achieve this, the unit tries to run a test current of  $I \approx 25\text{mA}$  for a period of approx.  $t = 380 \mu\text{s}$ .

If this is possible, the contact to the electrolyte is deemed secured and the green LED will flash.

If not, the LED will go out or emit red flashes. This program's step is to prevent creepage current causing false indications. If contact is made only through creepage, then the signal indicating a low electrolyte level will be emitted. This applies also to the FLI, which will normally not emit red flashes.

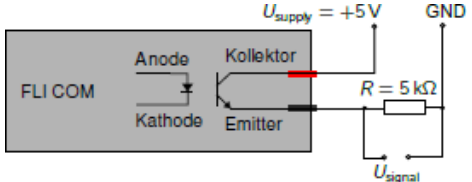

**Spilling hysteresis function (Ad-models only):** In order to avoid too frequent switching of the Ad-FLI, the switching behaviour are dampened by an asymmetric switching delay:

- Green LED flashes. Contact to the electrolyte interrupted. Switching to the red signal after 25-40 seconds
  - Red LED flashes. Contact to the electrolyte is made. Switching to the green signal after 8-12 seconds
- Permanent shortage of water indicator (Ad-models only):** The longer contact to the electrolyte is interrupted, the faster the red LED of the Ad-FLI will start to flash. The following rule of thumb applies: "One Hz of flashing frequency for every day". After a period of approx. 5 days, the Ad-FLI will permanently emit red flashing signals.

### Technical data

		Basic Level Indicator		Advanced Level Indicator		Advanced Level Indicator with Remote display	
							
LED Indications	Level OK	Green		Green		Green	
	Fill now	No light		Red symmetrical pulse, depending on time

## 4. Aqua Accessories

### 4.1 BFS

#### 4.1.1 Water Filling Systems

The BFS System:

A Synthesis of Technology and Design.

Battery service and care can be a complicated and time-consuming process that is not without its dangers. An automatic battery watering system is the best alternative – for several reasons:

Efficient – You don't need to remove caps by hand and water cells manually.

Precise – Electrolyte is reliably filled to exactly the same level. Safe – No risk of injuring yourself with battery acid.

Time-saving – The time required to water a battery is reduced significantly. Cost-saving – Saving time means saving money.

**T** = top of cell to top of separator  
**T1** = top of cell to base of float  
**T2** = top of cell to top of electrolyte level

The filling level T2 on the list is an average with a tolerance of +/- 2,0mm (0.075").  
**For stationary batteries mainly T2 is deciding!**

|--------------------|------------|------------|-----------------------|------------|------------|------------|
| Push-in:           | A – A51000 | B – A4N000 | BB – A4N with housing |            |            |            |
| Bayonet:           | C – H4N000 | D – H51000 | E – B4N100            | F – B51000 | K – G51000 |            |
| Clip-in:           | G – I4N000 | H – I4NV00 | I – I4N260            | J – I4N420 | N – I51000 | Q – I4N330 |
| Treaded:           | O – C51000 | P – C4N000 | R – D51000            | S – E51000 | T – F51000 |            |
| Central degassing: | U – F51220 | V – E51220 | W – D51220            | X – C51220 | Y – A51220 | Z – B51220 |

Battery Voltage: \_\_\_\_\_  
*For example 48V*

Coupling inlet: \_\_\_\_\_

- B – BFS
- C – CPC
- F – Frötek

Dust cap (09STAC): \_\_\_\_\_

- N – No Cap C
- With Cap

Flow Indicator (09FLI1B): \_\_\_\_\_

- N – No Flow Indicator I
- With Flow indicator

Filter (09FIL1B): \_\_\_\_\_

- N – No Filter F
- With Filter

Float - to be determined via table "calculation of float size": \_\_\_\_\_

*Example: 34 = BFS-072234*

### 4.1.2 Quick Couplings

#### BFS

Article nr.	Description
09KUM6B	Connection Female with Valve 6 mm - water supply
09KUM1B	Connection Female with Valve 10 mm - water supply
09KUV6B	Connection Male with Valve 6 mm - Battery
09KUV1B	Connection Male with Valve 10 mm - Battery

Article nr.	Description
08KLE1B	Twist clamp NW10

Article nr.	Description
08KLE6B	Twist clamp NW6

## FRÖTEK

Article nr.	Description
K6	Coupling Female K6 - Blue, without valve - 6 mm - Water inlet
K10	Coupling Female K10 - Blue, without valve - 10 mm - Water inlet
KV6	Coupling Female KV6 - Grey, with valve - 6 mm - Water inlet
KV10	Coupling Female KV10 - Grey, with valve - 10 mm - Water inlet
S6	Coupling Male S6 - Blue, without valve - 6 mm - Battery
S10	Coupling Male S10 - Blue, without valve - 10 mm - Battery
SV6	Coupling Male SV6 - Grey, with valve - 6 mm - Battery
SV10	Coupling Male SV10 - Grey, with valve - 10 mm - Battery

## All-In-One-Couplers

Article nr.	Description
AIO-C-F-1NW10	Coupling All-In-One Female 1xNW10
AIO-C-F-1NW06	Coupling All-In-One Female 1xNW06
AIO-C-F-2NW06	Coupling All-In-One Female 2xNW06
AIO-C-M-1NW10	Coupling All-In-One Male 1xNW10
AIO-C-M-1NW06	Coupling All-In-One Male 1xNW06
AIO-C-M-2NW06	Coupling All-In-One Male 2xNW06

## SPECIAL COUPLINGS

Article nr.	Description
WM-NS4D17006	Non-spill coupling PP 9.5 mm - female/socket
WM-NS4D22006	Non-spill coupling PP 9.5 mm - male/plug

## 4.2 Philadelphia Scientific

### 4.2.1 Water Injectors

The Water Injector System™ is the world's fastest and most reliable way to add water to industrial batteries. Filling a battery takes just 15 seconds, which means that you can fill 8 batteries in the time that it takes to fill 1 battery with other systems! There are two versions of the system available to meet your needs: the Water Injector Classic System™ and the Water Injector Spider System™. Both systems feature legendary reliability and speed of fill but differ in the way that the water is delivered to each Injector valve and the way they fit on top of the battery.

The system saves money in two ways. First, it cuts labor costs, often paying for itself within its first year of operation. Second, it extends the life of each expensive battery onto which it is installed due to improved quality of watering.

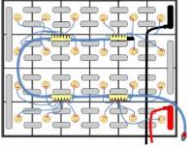

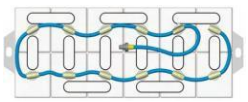

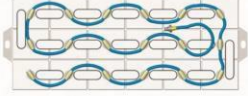

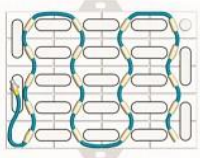

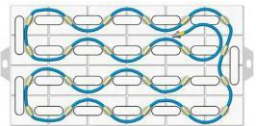

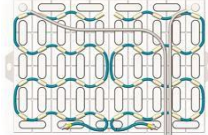

The system also improves safety and environmental cleanliness. There is no need to peer into cells to inspect levels as with manual filling. And water Injectors automatically fill each cell to the correct level, so there is no overfilling and no electrolyte spillage during charging. Did you know that each time a battery boils over it loses 3% of its capacity? That equates to 15 minutes of run time for each and every boil over! And the only way to recover the capacity is to perform an expensive acid equalization process, which typically costs more than the Water Injector System.

Because of its robustness and reliability, the Water Injector System is the preferred system for all Opportunity and Fast/Rapid charge applications.

	Water Injector Spider System	Water Injector Classic System
Layout		
Input/Operating Pressure	25 to 35 psi	
Acceptable Filling Temperature	35° to 160°F	
Valve Body Material	Polypropylene	
Flow Rate	8 to 10 gpm per string	
System Exposure Temperature	-20° to 160°F	
Tubing Material	Proprietary flexible PVC	
Fitting Type (Compatible with Vent Opening Types)	US 1/4 Turn & DIN	
Maximum number of valves per input coupling	24	
Input Hose Size	1/2 in	
Max Valve Height above Vent	0.85 in	1.10 in

	INJ-NC-007	Terminating Water Injector, Nicad With Flame arrestor adaptor	Classic

#### 4.2.2 Water Deionizer

Hard water in your water supply may be causing poor battery performance. Metallic impurities in water can affect cell voltages and increase self-discharge, resulting in shortened battery run time and reduced battery life. The traditional method to avoid water impurities is to use distilled water, an expensive and inconvenient proposition. Using deionized water is a simple and effective way to maximize battery life.

##### Easy to use

- Comes with everything you need to make pure water from the tap
- Operates at full-line pressure to dispense pure water directly from the deionizer
- Quick cartridge replacement requires no tools
- 6 m output hose allows maximum watering flexibility and convenience
- Optional Watering Gun lets you fill a battery directly from the deionizer

##### High capacity

- Cartridge is rated for 2300 litres or 600 gallons of pure water\*
- ➔ Capacity varies with purity of incoming water. See Purity Chart

##### Exclusive battery-operated purity light

- Dual color light indication signals when it's time to change the cartridge
  - Green light means water quality is OK
  - Red light means it is time to change cartridge
  - No light means batteries need to be changed
- Includes 2 D-cell batteries that will last for 2 years
- No need to mount near AC power source

##### Easy installation

A mounting plate with hose hanger is provided for easy installation. The cartridge has standard hose fittings and connects in seconds to the input and output hoses with quick-connect couplings. No plumber or maintenance department is required. Cartridge replacement takes just seconds – and disposal is easy because cartridge contents are non-toxic.

##### Pressurized system

Unlike some lab-type systems, the WD2000 cartridge takes full-line pressure up to 5,5 bar (80 psi). So the water flow is fast enough to use directly with the Watering Gun.

##### Low cost

Cartridges are available for a fraction of the cost of distilled water, enabling battery

users to produce their own pure water for less money than it would cost to buy it.

### Specifications

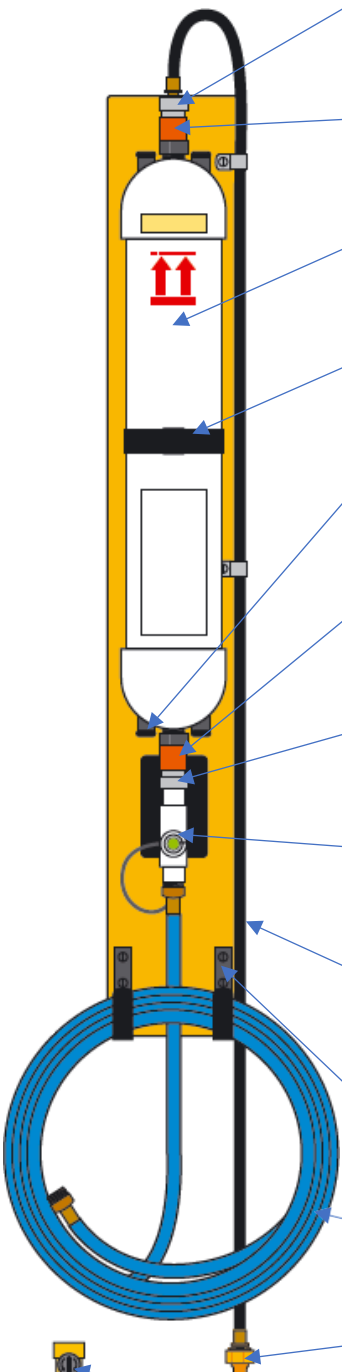

Order reference	WD2000	
Flow Rate – with provided restrictor	2 lpm (0.5 gpm)	
Purity Light Power Source (included)	2 D-cell Batteries	
Life Estimation	2 years	
Purity Light Setting	50 ppm	
Dimensions	Mounting Plate	1115 mm x 155 mm (44" x 6")
	Disposable Cartridge	690 mm x 123 mm (27" x 4.5")
	Input Hose	9,5 mm x 3m (3/8" x 10')
	Output Hose	9,5 mm x 6m (3/8" x 20')
Maximum pressure tap water	5,5 bar (80 psi)	

### Purity Chart (= capacity in function of purity of incoming water)

↓Purity of tap water↓	Total Dissolved Solids*		Conductivity*	Cartridge Capacity	
	PPM	Grains	µS/cm	Litres	U.S. Gallons
Good	20	1.17	30	13.627	3600
	50	3	75	5.451	1440
	75	4	112,5	3.634	960
Average	100	6	150	2.725	720
	125	7.3	187,5	2.180	576
	150	9	225	1.817	480
Poor	200	12	300	1.363	360
	250	15	375	1.090	288
	300	17.5	450	908	240

Spare parts

WGU-XPS	<b>Universal watering gun</b> * also order WD-PS-121 to couple to de deioniser	

### 4.2.3 Water Caddy

One of the major and time-consuming issues with filling your batteries up quickly and easily is an adequate water supply.

More often than not, the water supply is not the easiest place to get to and can be on the other side of the warehouse, which is expensive to reposition. What's more of an issue is that operators often use this water to fill their batteries, which can cause a lot of issues such as increased self-discharge, shortened run time, and reduced battery life. Battery water should be free from impurities because they can directly affect cell voltages and cannot be removed by using conventional filters. The range of battery watering carts can help to make that laborious task a breeze to do. The range of tanks are designed to be easily moved from your source of deionized water to your battery room. This allows you to efficiently fill up your entire fleet when you need to.

Vandapower offers three types of water caddies.

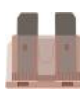

- The electrical water caddy from Philadelphia Scientific is available with a 10 Gallon and a 16 Gallon tank. The caddies can be optionally equipped with a filling gun with a filling adapter for use with an automatic battery watering system.
- The manual Vandapower 4 Gallon pressure tank with trolley is lightweight and easy to use.

#### 4.2.4 Water Tanks

# AQUA ACCESSOIRES WATERTANKS

## WTA16/30

Water tank: 30 L, white, with tap, flow-indicator, female connection, 3 or 5m PVC tube, lid opening 80 mm.

Special features (see image below):

- Reinforced bottom side.
- Reinforced threaded tap connection (20mm depth)

## WTA60-2

Water tank: 60 L, white, with tap, flow-indicator, female connection, 3 or 5m PVC tube.

Special features (see image below):

- 2 lid openings DIN 61
- Reinforced bottom side.
- Reinforced threaded tap connection (20mm depth)

More assembled water tanks available on request. Please contact our office.

**WTA30SUPP: support for water tank 30 L**

**WTA30-60SUPP: support for water tank 30 L and 60 L**

**WTA15GV3, WTA...GV3, WTA500GV3**

Strong water tank.

Available in 15, 30, 50, 80, 100, 125, 150, 200, 300, 500 L.

All tanks available with female connection, 3m PVC tube, flow-indicator, and valve.

## WTA60FLOAT

#### 4.2.5 Watering Guns

No battery room should be without this essential maintenance tool. Simply connect the Battery Watering Gun to a standard water hose or a Deionizer, put the tip of the gun into the cell, and squeeze the ergonomic handle. It also saves money: compared to hand watering, the battery watering gun reduces labour costs up to 150 Euro's a year for each 18-cell battery.

##### BENEFITS

▲ Wide range: We offer a wide range of watering guns from Philadelphia Scientific and other suppliers  
▲ Safe: It keeps eyes and face away from battery hazards and reduces backache from bending over.

batteries. It is insulated to prevent sparking on connectors.

▲ Easy Installation: Attach the Battery Watering Gun to any standard garden hose, a HydroFill Watering Cart, or a Deionizer System and you have a fully operating battery filling system.

▲ Fast but gentle: A flow rate up to 6,4 litres/minute (1.7 gallons/minute), which is fast enough for the largest cells. Yet the flow is gentle enough to fill a coffee mug.

##### POSSIBLE FEATURES

▲ Automatic shutoff: The Watering Gun fills cells to precisely the correct level. The shutoff is so positive you can actually feel it.

▲ LED + Buzzer indicator: Flashing red LED and buzzer via contact electrodes when the level is reached  
▲ Integrated flow indicator: Shows when the filling/flow has stopped.

## 5. Miscellaneous Battery Accessories

### 5.1 Drainage pumps

- Article nr. DRAINP-MAN-6L.
- 6 litre capacity.
- Acid-proof material.

### BIO15 SUCTION PEAR

ARTICLE NR.	DESCRIPTION
BIO15	BIO 15 - PEAR 340ml with pipe 70mm
BIO15-ABR	BIO 15 - PEAR 340ml with pipe 70mm + suction tube 6x760 P555

## ELECTRICAL DRAINAGE PUMP

- Electrical-operated acid-extraction-station incl. drainage pump.
- 3 m suction tube 6 x 1,5 mm,
- 2 m discharge tube 10 x 2 mm
- 12 V 12 Ah battery + charger
- Drip tray
- ON / OFF switch
- Diode in PVC box with shoulder strap

ARTICLE NR.	DESCRIPTION
DRAINP-BAMOB	Drainage Pump with battery - mobile

## MANUAL FILLING PUMP

ARTICLE NR.	DESCRIPTION
PUMP-BA	Pump for filling Acid/Water
PUMP-BA-F7	Pump for filling acid/water – foot operation

## 5.2 Acid Circulation Systems

### Electrolyte Circulation

A membrane pump ensures permanent electrolyte movement inside the cell. Pumping air into the base of the cell maintains electrolyte circulation preventing varying temperatures and electrolyte densities throughout the cell.

- The sealing grommet is directly injected moulded onto the tube before it is installed in the cell lid.
- Tail ends, corners and T-pieces are put on.
- This system offers you the advantage of reduced storage.
- There are different lengths of tubes. The immersion depth must be at least  $\frac{3}{4}$  of the cell height.

#### Standard Electrolyte Circulation Tubes

Picture	Ordering code	Description
	EUW-TUBE	Electrolyte circulation tube with moulded T-piece - 600 mm • <i>Standard length</i>
		Also available in lengths: 550, 470, 420, 385, 330, 265 mm • <i>To be ordered per 50 pieces</i> Or the standard length of 600mm can be shortened to the desirable length
	END6EUW	End piece NW 6 for electrolyte circulation

### Electrolyte Circulation Tubes Version R

Picture	Ordering code	Description
	EUW-R-640	Electrolyte circulation tube with moulded opening - 640 mm <ul style="list-style-type: none"> <li>• <i>Standard length</i></li> </ul>
	Also available in lengths: 615, 535, 495, 470, 440, 415, 390, 340, 270, 210 mm <ul style="list-style-type: none"> <li>• <i>To be ordered per 50 pieces</i></li> </ul> Or the standard length of 640mm can be shortened to the desirable length	
	EUW-E	E-piece for electrolyte circulation – corner <ul style="list-style-type: none"> <li>• <i>Reinforced version (standard)</i></li> </ul>
	END6EUW	End piece NW 6 for electrolyte circulation
	EUW-L	L-piece for electrolyte circulation - end
	EUW-T	T-piece for electrolyte circulation <ul style="list-style-type: none"> <li>• <i>Reinforced version (standard)</i></li> </ul>
	EUW-ADAP	Adapter for electrolyte circulation tube <ul style="list-style-type: none"> <li>• <i>To extend the tube connection by 25 mm</i></li> </ul>

### Electrolyte Circulation Tubes Version R-H2

Picture	Ordering code	Description
	EUW-R-H2-680	Electrolyte circulation tube with moulded opening - 680 mm • <i>Standard length</i>
	Also available in lengths: 311, 371, 441, 511, 534, 572, 644 mm • <i>To be ordered per 50 pieces</i> Or the standard length of 680mm can be shortened to the desirable length	
	END6EUW	End piece NW 6 for electrolyte circulation
	EUW-L-H2	E-piece for electrolyte circulation – corner
	EUW-T-H2	T-piece for electrolyte circulation

Electrolyte Accessories		
Picture	Ordering code	Description
	FRSCH06	PVC hose 6 x 1,5 mm
	09BKM6B	Quick coupling female NW6 (Air)
	09BKV6B	Quick coupling male NW6 (Air)
	08KLE6B	Hose clamp NW6 (for 09KUM6B and 09KUV6B)

### 5.3 Battery Acid Testers and Thermometers

A battery hydrometer or acid tester is used to test the state of charge of a battery cell. This is performed by measuring the density of the electrolyte, which is accomplished by measuring the specific gravity of the electrolyte. The greater the concentration of sulfuric acid, the denser the electrolyte becomes.

Vandapower can supply different acid testers:

- different sizes
- with plastic cylinder or glass bulb
- measuring ranges from 1,08 to 1,30 g/ml
- different graduations: 0,005 g/ml or 0,01 g/ml
- different sizes of suction hoses

Serie 6300

**Specifications**

<b>Material</b>	Straight plastic cylinder
<b>Measuring range</b>	1,10 to 1,30 g/ml
<b>Graduations</b>	0,01 g/ml
<b>Suction volume</b>	18 ml
<b>Overall length</b>	255 mm
<b>Weight</b>	100 gr

**Ordering codes**

<b>AK-SP-6300</b>	With suction hose length 52 mm, diameter 5,2 mm
<b>AK-SP-6320</b>	With suction hose length 140 mm, diameter 5,2 mm
<b>AK-SP-6322</b>	With suction hose length 130 mm, diameter 3,1 mm

**Extra info**

- Universal workshop device
- Sturdy design with straight plastic cylinder
- Small suction volume, but large areometer
- Centered areometer, no swinging, no lateral contact, correct and fast reading
- Broad colored scale and numerical scale

Serie 6500

**Specifications**

<b>Material</b>	Bulged glass cylinder
<b>Measuring range</b>	1,08 to 1,30 g/ml
<b>Graduations</b>	0,005 g/ml
<b>Suction volume</b>	38 ml
<b>Overall length</b>	328 mm
<b>Weight</b>	150 gr

**Ordering codes**

<b>AK-SP-6500</b>	With suction hose length 52 mm, diameter 5,2 mm
<b>AK-SP-6520</b>	With suction hose length 140 mm, diameter 5,2 mm
<b>AK-SP-6522</b>	With suction hose length 130 mm, diameter 3,1 mm

**Extra info**

- Large model with bulged glass cylinder
- For large vehicle batteries and stationary accumulators
- Accurate reading through large scale with small graduations
- Suitable for calibration, supplied with calibration certificate on request

**Serie 1260**

**Specifications**

<b>Material</b>	Straight glass cylinder
<b>Measuring range</b>	1,10 to 1,30 g/ml
<b>Graduations</b>	0,010 g/ml
<b>Calibration temperature</b>	20°C
<b>Overall length</b>	± 320 mm
<b>Weight</b>	140 gr

**Ordering codes**

<b>AK-SP12620</b>	With suction hose length 140 mm, diameter 4 mm
-------------------	--

**Extra info**

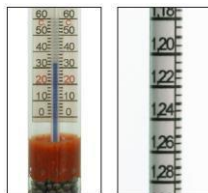

- Large model with straight glass cylinder
- For frequent workshop use
- Precision model, accurate reading

## Acid tester with glass bulb and build-in thermometer

### Serie 6600

#### Specifications

<b>Material</b>	Bulged glass cylinder	
<b>Measuring range</b>	1,08 to 1,30 g/ml	
<b>Graduations</b>	0,005 g/ml	
<b>Suction volume</b>	38 ml	
<b>Temperature display</b>	0 to 60°C	
<b>Overall length</b>	328 mm	
<b>Weight</b>	155 gr	

#### Ordering codes

<b>AK-SP-6600</b>	With suction hose length 52 mm, diameter 5,2 mm	
<b>AK-SP-6620</b>	With suction hose length 140 mm, diameter 5,2 mm	
<b>AK-SP-6622</b>	With suction hose length 130 mm, diameter 3,1 mm	

#### Extra info

- Large model with bulged glass cylinder
- For large vehicle batteries and stationary accumulators
- With build-in thermometer for temperature reading
- Accurate reading through large scale with small graduations
- Suitable for calibration, supplied with calibration certificate on request

### Thermometer Alcohol Liquid

#### Specifications

<b>Material</b>	Sodocalcique glass
<b>Measuring range</b>	-10°C to +60°C
<b>Graduations</b>	0,5°C
<b>Accuracy</b>	1°C
<b>Overall length</b>	305 mm
<b>Diameter</b>	6 - 7 mm

#### Ordering codes

<b>AK-TH-10/60</b>	Thermometer, length 305mm, -10/+60°C : 0,5°C
--------------------	--

#### Extra info

- Solid stem thermometer for daily use
- Non-roll design
- Very readable printed graduation
- Resistant to aggressive agents (except fluoridric acid and hot soda)
- Yellow enamel backing, red liquid
- Total immersion: the thermometer must be immersed at the same level of the temperature read

## 5.4 Maintenance and cleaning

### BatteryShine

BatteryShine is a professional battery cleaner that removes battery corrosion fast and efficiently. It can be applied undiluted, using the atomiser. It is not advised to use it with a steam cleaner. Please keep in mind the safety precautions delivered with the product.

Make sure all battery cell plugs are closed well before using the product. Spray a film over the battery, especially onto the terminals and wait a few minutes. Then rinse off the product from the battery.

After drying the product leaves a film which protects against corrosion.

Also available with neutraliser/leak detector:

This product neutralises any acid spilled and allows it to be rinsed off in a clean and environmentally friendly way.

Make sure all battery cell plugs are closed well before using the product. Spray a film over the battery, especially onto the terminals and wait for a few minutes.

When acid is detected, the yellow foam will turn pink. Hence the product contains a coloured indicator which permits easy spotting of acid leaks.

Keep on spraying the product onto the battery until the foam turns yellow again. The acid is then neutralised, making it environmentally safe to rinse off the product.

Product		
Picture	Ordering code	Description
	VDBATCL1	BatteryShine battery cleaner, in bottle with spray nozzle - 1 L
	VDBATCL5	BatteryShine battery cleaner, tank 5 L
	VDBATNE1	BatteryShine neutralising battery cleaner with leak detector, in bottle with spray nozzle - 1 L
	VDBATNE5	BatteryShine neutralising battery cleaner with leak detector, tank 5 L

## 5.5 Digital Multimeter

- **Article code DIG-MM1**
- 3 ½ digit LC and bar graph display with polarity and battery low voltage indication.
- For voltage, DC current and resistance measurements, continuity and diode testing.
- DC voltage : 320 mV / 600 V (5 ranges)
- Accuracy : ± 0.5 % + 2 digit
- AC voltage : 3.2 V / 600 V (4 ranges)
- Accuracy : ± 1.5 % + 5 digit
- DC current : 320 μA / 3200 μA (2 ranges)
- Accuracy : ± 1.0 % + 2 digit
- Resistance : 320 Ω / 32MΩ (6 ranges)
- Accuracy : 320 Ω : ± 1.0 % + 4 digit  
3.2 kΩ – 3.2 MΩ : ± 0.8 % + 2 digit  
32 MΩ : ± 2.0 % + 5 digit
- Continuity test : 20 Ω
- Diode test : 1.5 mA
- All measures with overload protection

## 5.6 Spring Balancers

Application: when heavy battery connectors/cables have to be easily portable.

In order to support the weight of pneumatic, hydraulic and electric equipment, the use of a spring balancer should be considered. The performance of the equipment will be speeded up due to good balance and reduced operator fatigue, when using a spring balancer.

Main features:

- Rugged construction, cast aluminium body.
- Stainless steel rope.
- Adjustable capacity.
- Auxiliary safety suspension.
- Adjustable stroke limiting device.
- Cable guide in antifriction material.
- Inert spring drum assembly.
- Polyamides thimble.

### Spring balancers

Picture	Ordering code	Description	Specifications
	BAL9311	Balancer 0,4 – 1,0 kg – 1,6m	Cable length: 1,6 m Capacity: 0,4 - 1,0 kg Weight: 0,6 kg
	BAL9312	Balancer 1,0 – 2,0 kg – 1,6m	Cable length: 1,6 m Capacity: 1,0 - 2,0 kg Weight: 0,6 kg
	BAL9313	Balancer 2,0 – 3,0 kg – 1,6m	Cable length: 1,6 m Capacity: 2,0 - 3,0 kg Weight: 0,7 kg

Dimensions for BAL9311, BAL9312 and BAL9313

### 5.7 Safety Kit

The Safety Kit and Safety Box provides you with all the necessary equipment to protect yourself when maintaining/topping up batteries: safety glasses, apron, gloves, soda. The Safety Kit also includes first aid accessories such as an eye-shower and first aid kit.

### SAF-KIT V3

### SAF-BOX 31

## SAF-KIT V3

### Products included in the Safety Kit

Picture	Ordering code	Description
	SK-AID	First aid kit – 40 pieces Included: 10 waterproof plasters, 2 Steropore non-woven plasters 7,5x5cm, 6 alcohol free swabs, triangle bandage, elastic gauze bandage 5 cm, elastic gauze bandage 7 cm, adhesive plaster 1.25 cm, 2 sterile non-adhesive compresses, 5 sterile compresses 10 x 10 cm, instant Cold Pack, pair of gloves, scissors, 12 safety pins
	SK-SODA	Fine soda 1kg
	SK-SG-SAF	Safety glasses
	SK-ESCH-PL001	Eyewash bottle – 200 ml – NaCl
	SK-ESCH-PL005	Eyewash bottle – 200 ml – PH neutral
	SK-GL-35	Pair of acid-resistant PVC-coated gloves - 350 mm
	SK-APR90130	Apron 90 x 120 cm, white
	SAF-KIT V3-ST	Sticker for Safety Kit
	SAF-KIT-BUTT	Mini cam lock with wing knob for SAF-KIT V3, black (standard on SAF-KIT V3-BUTT)

## SAF-BOX 31

### Products included in the Safety Box

Picture	Ordering code	Description
	SK-SODA	Fine soda 1kg
	SK-SG-SAF	Safety glasses
	SK-ESCH-PL001	Eyewash bottle - 200 ml - NaCl
	SK-GL-35	Pair of acid-resistant PVC-coated gloves - 350 mm
	SK-APR90130	Apron 90 x 120 cm, white
	SAF-KIT V3-ST	Sticker for Safety Kit

### 6.1.4 Single Conductor Double Insulated Cable

<b>DOUBLE INSULATED PVC-NBR CABLE</b>	
	
<b>TECHNICAL SPECIFICATIONS</b>	
<b>Cable standards</b>	EN 60228, Cl. 6
<b>Voltage rating</b>	600 V / 1000 v
<b>Temperature rating</b>	-35°C to +80°C
<b>Cable construction</b>	Super fine strands of annealed bare copper as per EN 60228, Cl. 6 NBR (80%) and PVC (20%) insulation and outer sheath
<b>Minimum bending radius</b>	5 x overall diameter
<b>Special properties</b>	The heavy duty cable is resistant to flame, oil, abrasions, tar and grease. The cable is suitable for use in open air, in dry as well as in damp interiors. The high degree of flexibility avoids formation of knots in the cable.

<b>CABLE DESIGN PARAMETERS</b>						
Nominal Cross-Section (mm <sup>2</sup> )	Number of strands	Nominal thickness of insulation (mm)	Max. Diameter of wires in Conductor (mm)	Nominal overall diameter (mm)	Max. DC Conductor Resistance at 20°C (Ω/km)	Approx Weight (kg/km)

### 6.1.5 Single Conductor TPE Class 6 Cable

<b>TPE BATTERY CABLE Class 6</b>	
	
<b>TECHNICAL SPECIFICATIONS</b>	
<b>Cable standards</b>	Adapted to BS 6862
<b>Voltage rating</b>	Max 200 V
<b>Test Voltage</b>	1000 V
<b>Temperature rating</b>	-40°C to +90°C
<b>Cable construction</b>	Bare copper wires as per EN 60228, class 6
<b>Insulation</b>	Thermoplastic Elastomer
<b>Special properties</b>	Resists for 60h acid resistance test in sulphuric acid with specific gravity 1,28 at a temperature of 160°C to 210°C No effect on insulation: insulation free from deformation and shrinkage Chemical resistance: resistant to ozone, acids, solvents, detergents, vaseline and oils

<b>CABLE DESIGN PARAMETERS</b>				
Nominal Cross-Section (mm <sup>2</sup> )	No. of Wires	Max. Diameter of wires in Conductor (mm)	Nominal overall diameter (mm)	Max. DC Conductor Resistance at 20°C (Ω/km)

## 6.2 Cable Accessories

### 6.2.1 Accessories

CABLE PROTECTION AND SLEEVES		
Picture	Ordering code	Description
	PMA-12B	Corrugated pipe diam. 12mm
	PMA-14B	Corrugated pipe diam. 14mm
	SPSCH15CON	Spiral wrapping, Black, per meter (packaging 20m)
	BR-PET20	Braided PET cable sleeve Pliosil – min. diam. 20 mm
	BR-PET30	Braided PET cable sleeve Pliosil – min. diam. 30 mm
	MOF-7.5/12-BL	Elastic blue sleeve
	MOF-7.5/12-RED	Elastic red sleeve
	MOF-7.5/12-ZW	Elastic black sleeve
	KY3	Sleeve expander tool - Type KY3
	HSB500-RED-100m	Heat-shrink tubing 12,7 mm / 6,4 mm – Red – per meter
	HSB750-RED-50m	Heat-shrink tubing 19 mm / 9,5 mm – Red – per meter
	HSB500-BLUE-100m	Heat-shrink tubing 12,7 mm / 6,4 mm – Blue – per meter
	HSB750-BLUE-50m	Heat-shrink tubing 19 mm / 9,5 mm – Blue – per meter
	HSB500-BLACK-100m	Heat-shrink tubing 12,7 mm / 6,4 mm – Black – per meter
	HSB750-BLACK-50m	Heat-shrink tubing 19 mm / 9,5 mm – Black – per meter

## Cable clamps for battery tray

<b>CABLE CLAMPS</b>		
<b>Picture</b>	<b>Ordering code</b>	<b>Description</b>
	ZGEL25	Cable clamp for battery tray – 25 mm <sup>2</sup>
	ZGEL35	Cable clamp for battery tray – 35 mm <sup>2</sup>
	ZGEL50	Cable clamp for battery tray – 50 mm <sup>2</sup>
	ZGEL70	Cable clamp for battery tray – 70 mm <sup>2</sup>
	ZGEL95	Cable clamp for battery tray – 95 mm <sup>2</sup>

## Feed-through sealing components

<b>POLYAMIDE CABLE GLANDS</b>	
<b>Picture</b>	<b>Description</b>
	<ul style="list-style-type: none"> <li>- Material: PA 6</li> <li>- Sealing ring: TPV</li> <li>- Available in white (light grey), grey and black</li> <li>- Temperature: -20 to 100°C</li> <li>- conform N62444</li> <li>- available in sizes PG7 – PG48</li> <li>- available in sizes M12 – M63</li> <li>- counter nut optional</li> </ul>

<b>METAL CABLE GLANDS</b>	
<b>Picture</b>	<b>Description</b>
	<ul style="list-style-type: none"> <li>- Material: nickel plated brass</li> <li>- Sealing ring: TPV</li> <li>- O-ring: NBR</li> <li>- Temperature: -20 to 100°C</li> <li>- IP68</li> <li>- conform N62444</li> <li>- available in sizes PG7 – PG48</li> <li>- available in sizes M12 – M63</li> <li>- counter nut optional</li> </ul>

### Ordering codes for cable glands

Example:

**CGPA-M20-WHT**

<p>CG: Cable Gland _____</p> <p>Material: _____</p> <p>PA – Polyamide</p> <p>ME – Metal (nickel plated brass)</p> <p>Size: _____</p> <p>PG7 – PG9 – PG11 – PG13,5 – PG16 – PG21 – PG29 – PG36 – PG42 – PG48 M12</p> <p>– M16 – M20 – M25 – M32 – M40 – M50 – M63</p> <p>Color (only for Polyamide cable glands): WHT _____</p> <p>– White (light grey)</p> <p>GREY – Grey</p> <p>BLK – Black</p>	
--	--

### MODULAR FEED-THROUGH SEALING COMPONENTS

#### Pictures

#### Description

- Lightweight composite frame cable seals.
- Fits directly into standard openings.
- The seals are available in six sizes.
- For cable capacities from 4 to 32 cables.
- IP 66/67 protection.
- For cables with an outer diameter of 3,5 – 34,5 mm (0.138 – 1.358 inch)
- Versions available for FL21 recess and opening for 24-pin connector
- Easy install
- Mounting type: bolted
- Corrosion resistant
- Suitable for cables with connector
- Also other variants available

## Polyamide cable ties

CABLE TIES		
Picture	Ordering code	Description
	PSB120WH	Polyamide cable tie – CV 120 – 100 pieces – White
	PSB150WH	Polyamide cable tie – CV 150 – 100 pieces – White
	PSB200WH	Polyamide cable tie – CV 200 – 100 pieces – White
	PSB250WH	Polyamide cable tie – CV 250 – 100 pieces – White
	PSB140ZW	Polyamide cable tie – CVW 140 – 1000 pieces – Black
	PSB150ZW	Polyamide cable tie – CVW 150 – 1000 pieces – Black
	PSB200ZW	Polyamide cable tie – CVW 200 – 100 pieces – Black
	PSBTG7	Tool for tie wrap 1 - 5,5mm

### 6.2.3 Battery Terminals

## Terminals and special bolts

BATTERY TERMINALS		
Picture	Ordering code	Description
	TERM.NEG.15.9	Bolt-on battery terminal negative 17.9/15.9
	TERM.POS.17.5	Bolt-on battery terminal positive 19.5/17.5
	BT-QP-B	Quick Power "OJOP" 16mm <sup>2</sup> – Blue – Negative terminal
	BT-QP-R	Quick Power "OJOP" 16mm <sup>2</sup> – Red – Positive terminal

SPECIAL BOLTS AND TERMINALS		
Picture	Ordering code	Description
	EABM10-12	Replacement pole M10 – diam. 12 mm
	DBM10M10	Double sided bolt M10/M10 with "Fixcoat"
	DBM10M10+NUT	Double sided bolt M10/M10 + Nut M10
	SCREWAC	Screw M10x22 with auxiliary contact
	SCREWTERM	Welded terminal with screw + cap
	PACK157	Kit for mounting cable lug onto EnerSys terminal

CONICAL END TERMINALS		
Picture	Ordering code	Description
	CON-END-POS	Conical insert with bolt – 35/50 – Positive
	CON-END-NEG	Conical insert with bolt – 35/50 – Negative
	CON-END-L	Connection set terminal with conical insert 35/50 – Left – Positive
	CON-END-L-N	Connection set terminal with conical insert 35/50 – Left – Negative
	CON-END-R	Connection set terminal with conical insert 35/50 – Right – Positive
	CON-END-R-N	Connection set terminal with conical insert 35/50 – Right – Negative

## Gaskets and rings

GASKETS & RINGS		
Picture	Ordering code	Description
	ROND10-F	Copper ring M10 – 10,4 x 15 x 5 mm
	ROND10-15-2.3	Copper ring M10 – 10,4 x15 x 2,3 mm
	ROND110	Washer M10 – Diam. 20 mm
	ROND110-RVS-A2	Washer M10 – Diam. 29mm – Stainless A2
	RONDP375	Ring gasket 37 x 10,5 x 2
	RONDP3753	Ring gasket 37,5 x 15 x 3
	O-RING-15-21	O-Ring 15-21
	ROND10-PP-18-2	Adapter ring between “Flex” connector and EnerSys terminal

### 6.3 Alligator Clamps

ALLIGATOR/CROCODILE CLAMPS

Example:  
**CRC-FI-600A-RED**

“Crocodile Clamp” \_\_\_\_\_

Insulation: \_\_\_\_\_

FI – Fully Insulated

PI – Partially Insulated (= insulated handles)

Maximum Current: \_\_\_\_\_

- 40 A
- 80 A
- 100 A
- 300 A
- 500 A
- 600 A
- 750 A
- 800 A
- 900 A
- 950 A
- 1000 A

Color: \_\_\_\_\_

BLA – Black

RED – Red

Remarks:

- 500A, 950A and angled 1000A versions only available in fully insulated version
- Ordering codes for 1000A, angled versions are: CRC-FI-A-1000A-BLA and CRC-FI-A-1000A-RED

## 7. EV Charging

### 7.1 EV Charging Components

#### AC Charging cables

		<ul style="list-style-type: none"> <li>- Mode 3 AC charging cables</li> <li>- Type 1 and Type 2</li> <li>- IEC 62196-2 / SAE J1772</li> <li>- 1-Phase or 3-Phase</li> <li>- 20/32 A</li> <li>- Different lengths (4, 5, 6, 8m,...)</li> <li>- With or without temperature sensor</li> </ul>
		<ul style="list-style-type: none"> <li>- Mode 3 AC charging cables</li> <li>- Type 2</li> <li>- IEC 62196-2</li> <li>- 1-Phase or 3-Phase</li> <li>- 20/32 A</li> <li>- Different lengths (4, 5, 6, 8m,...)</li> <li>- With or without temperature sensor</li> </ul>

#### DC Charging cables

		<ul style="list-style-type: none"> <li>- Mode 4 DC charging cables</li> <li>- CCS-2 and CCS-1</li> <li>- 40/80/150/200/250 A</li> <li>- High power charging versions: 400/500 A (cooled)</li> <li>- Different lengths (4, 5, 6, <u>8m</u>...)</li> <li>- With or without temperature sensor</li> </ul>
		<ul style="list-style-type: none"> <li>- Mode 4 DC charging cables</li> <li>- CCS-2</li> <li>- 65/125/200 A</li> <li>- Different lengths (4, 5, 6, <u>8m</u>...)</li> <li>- With or without temperature sensor</li> </ul>

- for other brands and/or other types, please contact us

### Vehicle inlets

		<ul style="list-style-type: none"> <li>- AC or DC</li> <li>- with locking actuator</li> <li>- Type 2 (CCS), AC: 8kw (1-Phase) or 26,6 kW (3-Phase)</li> <li>- Type 1 (CCS), AC: 12 or 20 kW (1-Phase)</li> <li>- CCS Type 1 and 2, DC: 125, 200 or 250 kW</li> <li>- 480 VAC, 32 A</li> <li>- 1000 VDC, 125/200/250 A</li> <li>- Temperature sensor</li> </ul>
		<ul style="list-style-type: none"> <li>- 1-Phase or 3-Phase</li> <li>- 250 VAC, 32 A</li> <li>- 480 VAC, 32/63 A</li> <li>- 1000 VDC, 65/125/200 A</li> <li>- Temperature sensor optional (NTC or PT1000)</li> <li>- 4 possible positions for the lock (90° rotatable)</li> </ul>

### Socket Outlets

		<ul style="list-style-type: none"> <li>- IEC 62196-2</li> <li>- 1-Phase or 3-Phase</li> <li>- 20/32A</li> <li>- With or without LED-indicator</li> <li>- With or without temperature sensor</li> <li>- With or without lock 12V</li> </ul>
		<ul style="list-style-type: none"> <li>- IEC 62196-2</li> <li>- 1-Phase or 3-Phase</li> <li>- 16/32/63 A</li> <li>- Optional electronic or solenoid lock</li> <li>- 3 possible positions for the lock (120° rotatable)</li> <li>- With or without temperature sensor</li> </ul>

- for other brands and/or other types, please contact us

### DC Charge Controllers

		<ul style="list-style-type: none"> <li>- According to IEC 61851-23 and IEC 61851-1</li> <li>- AC and DC charging point</li> <li>- Programmable charging controller (IEC 61131)</li> <li>- With integrated 3G modem</li> <li>- CAN bus interface</li> <li>- RS485 / RS232 interface</li> <li>- Ethernet interface (RJ45)</li> <li>- OCPP 1.6J</li> </ul>
---	---	---

### AC Charge Controllers

		<ul style="list-style-type: none"> <li>- According to IEC 61851-1 (mode 3 charging)</li> <li>- Configurable</li> <li>- ISO 15118 compliant (V2G), depending on type</li> <li>- Dynamic load possible</li> <li>- USB interface, depending on type</li> <li>- Ethernet interface and 4G, depending on type</li> <li>- RS-485 bus system</li> <li>- Residual current monitoring module to be ordered separately</li> <li>- DIN rail with backplane bus connectors</li> <li>- RFID possible</li> <li>- web-based management</li> <li>- Open Charge Point Protocol (OCPP)</li> </ul>
		<ul style="list-style-type: none"> <li>- According to IEC 61851-1 (mode 3 charging)</li> <li>- Master and slave operation configurable</li> <li>- ISO 15118 compliant (V2G)</li> <li>- Dynamic load management</li> <li>- USB interface</li> <li>- Integrated 4G modem possible (SIM card needed)</li> <li>- Modbus</li> <li>- Integrated residual direct current monitoring (RCD module to be ordered separately)</li> <li>- RFID possible</li> <li>- OCPP 1.5 and 1.6 and EEBUS Protocol</li> <li>- Web interface configuration</li> </ul>

### DC Power Electronics

		<ul style="list-style-type: none"> <li>- DC power module</li> <li>- 19" rack mounting</li> <li>- CAN bus</li> <li>- 3-phase input</li> <li>- 150-1000 VDC output</li> <li>- 30 kW</li> </ul>
		<ul style="list-style-type: none"> <li>- DC power module</li> <li>- Rack mounting (control cabinet needed)</li> <li>- 3-phase input</li> <li>- 200-920 VDC output</li> <li>- 87,5 kW</li> <li>- combined up to 350 kW charging possible</li> </ul>

### Surge Protection

		<ul style="list-style-type: none"> <li>- Surge protective device type 1/2</li> <li>- for 3-phase (5 conductor)</li> <li>- Din rail mounted</li> </ul>
---	---	---

- for other brands and/or other types, please contact us

### Energy Meters/Billing Meters

		<ul style="list-style-type: none"> <li>- Universal DC Billing Meter</li> <li>- Compliant with VDE-AR-E-2418-3-100</li> <li>- Compliant with legal metrology for billing systems</li> <li>- Voltage measurement from 150V to 1150V</li> <li>- 400 and 600 A version</li> <li>- Ethernet communication</li> <li>- Bi-directional meter for V2G</li> <li>- Charging cable resistance compensation</li> </ul>
		<ul style="list-style-type: none"> <li>- MID approved</li> <li>- Modbus RTU interface</li> <li>- 1-Phase / 32A or 3-Phase / 65 A</li> <li>- 7-digit display</li> </ul>
		<ul style="list-style-type: none"> <li>- MID approved (AC) energy meter</li> <li>- 3-Phase</li> <li>- Direct measurement up to 80 A</li> <li>- Modbus/TCP , Modbus/RTU or M-bus interface</li> </ul>
		<ul style="list-style-type: none"> <li>- 3-Phase EQ-meter with IR-port</li> <li>- 65 A</li> <li>- Modbus RS-485 optional</li> <li>- MID approved</li> <li>- LCD with backlight</li> </ul>
		<ul style="list-style-type: none"> <li>- 1-Phase EQ-meter with IR-port</li> <li>- 65 A</li> <li>- Modbus RS-485 optional</li> <li>- MID approved</li> <li>- LCD with backlight</li> </ul>

### Ground Fault Detection/Residual Current Monitoring

		<ul style="list-style-type: none"> <li>- IEC 62955</li> <li>- Residual current monitoring module</li> <li>- for AC and DC residual voltages in AC installations</li> <li>- In combination with phoenix charge controllers</li> <li>- 100 A (1-phase) / 40 A (3-phase)</li> <li>- Fault Signal Output: Active High Open Drain</li> </ul>
		<ul style="list-style-type: none"> <li>- IEC 61851-1</li> <li>- Residual current monitoring module</li> <li>- for AC and DC residual voltages in AC installations</li> <li>- 50 A</li> <li>- 1- and 2-channel execution</li> </ul>
		<ul style="list-style-type: none"> <li>- Residual current monitoring module</li> <li>- 1-Phase or 3-phase (AC)</li> <li>- Up to 32A</li> <li>- LED indication</li> <li>- alarm relay with 1 N/C contact</li> </ul>
		<ul style="list-style-type: none"> <li>- IEC 61869-1</li> <li>- Current transformer</li> <li>- To connect directly into Bender charge controller</li> <li>- AC and DC residual current</li> <li>- six-core cable</li> <li>- up to rated voltage of 600V</li> <li>- rated current 48A</li> <li>- available with 3 cable lengths</li> </ul>
		<ul style="list-style-type: none"> <li>- RCD with automatic test and reset function</li> <li>- Type A / AP R</li> <li>- 2- or 4-pole (5 or 7 DIN modules)</li> <li>- 25/40/63 A</li> <li>- optional RS485 Modbus module (ARBus)</li> </ul>
		<ul style="list-style-type: none"> <li>- microprocessor-based ground-fault monitor for resistance-grounded and solid grounded systems</li> <li>- output relay with isolated normally open and normally closed contacts for use in independent control circuits</li> <li>- Current transformer to be ordered separately</li> <li>- SE-701</li> </ul>

### Insulation Monitoring

		<ul style="list-style-type: none"> <li>- ISOMETER</li> <li>- for DC charging stations (mode 4 / IEC 61851-23)</li> <li>- nominal voltage up to 1000 VDC</li> <li>- Measurement of the mains voltage (r.m.s.) with undervoltage and overvoltage detection</li> <li>- Modbus RTU interface</li> </ul>
		<ul style="list-style-type: none"> <li>- ISOMETER</li> <li>- for DC charging stations (mode 4)</li> <li>- Switchable between CCS and CHAdeMO</li> <li>- nominal voltage up to 1000 VDC</li> <li>- detection of symmetrical and asymmetrical insulation faults</li> <li>- Modbus RTU interface</li> </ul>

### Switch-disconnectors and Emergency stops

		<ul style="list-style-type: none"> <li>- OT Manual Switch-disconnector</li> <li>- Remote operation possible (Motorized)</li> <li>- 160-4000 A (IEC)</li> <li>- Modular system</li> <li>- 3-/4-pole</li> <li>- Front- or side-operated</li> <li>- Auxiliary contact blocks optional</li> </ul>
		<ul style="list-style-type: none"> <li>- 4-pole switch disconnecter</li> <li>- 25 and 40 A</li> <li>- 750 V</li> <li>- Front operated</li> <li>- DIN-rail mountable</li> </ul>
		<ul style="list-style-type: none"> <li>- Compact Emergency Stop</li> <li>- 24...300 V</li> <li>- 2NC</li> <li>- Twist release</li> <li>- Mushroom 40 mm</li> <li>- Non-illuminated</li> </ul>

- for other brands and/or other types, please contact us

### RFID

		<ul style="list-style-type: none"> <li>- RS-485 interface</li> <li>- USB interface</li> </ul>
		<ul style="list-style-type: none"> <li>- RS-485 interface</li> <li>- USB interface</li> </ul>
		<ul style="list-style-type: none"> <li>- RFID module without integrated status LEDs</li> <li>- ISO14443A/MIFARE standard</li> <li>- connected to the charge controller with RJ45 cable</li> </ul>

### Display

		<ul style="list-style-type: none"> <li>- Display <u>module</u></li> <li>- 2x16 characters</li> <li>- visualizes the status of the charge <u>controller</u></li> <li>- two RJ45 sockets</li> </ul>
		<ul style="list-style-type: none"> <li>- Touch panel, TFT Display</li> <li>- different sizes</li> <li>- RJ45 connection</li> <li>- Windows Embedded Compact 7</li> <li>- 2 USB interfaces</li> <li>- IP65 or IP67</li> <li>- Sunlight readable display</li> </ul>
		<ul style="list-style-type: none"> <li>- Touch panel, 12,1" TFT Display</li> <li>- IP65</li> <li>- 2x Ethernet RJ45</li> <li>- USB interface</li> <li>- COM (RS-232/422/485) interface</li> </ul>

- for other brands and/or other types, please contact us

## 7.2 Customized EV Charger Cables and Components

The definition of custom-made is built to a specific order or specifications.

We have in-house manufacturing and sourcing capabilities and a wide selection of tools, allowing us the flexibility to produce cables to your specifications. From one-offs to high volumes, simple or very complex, you can count on us.

As an independent expert we can propose alternatives in order to determine the assembly that best suits your application.

We can make your cables to your wishes:

- with the connection you need: with cable lugs or other connectors.
- cut to exact length
- wires dismantled
- with markings
- provided with cable gland to mount in the cabinet
- with extra protection, for example heat shrink tubing
- ....

We can make the cable completely ready to install which has a lot of advantages for you:

- saving production time
- no need for you to buy and take stock of small components needed to make the cables, saving time and costs in logistics and purchase.

## 7.3 Fuses

### 7.3.1 General Purpose Fuses

Overcurrent protection is critical to personal safety and protection of your system. All electrical systems eventually experience overcurrent's. Unless removed in time, even moderate overcurrent's quickly overheat system components, damaging insulation, conductors, and equipment. Large overcurrent's may melt conductors and vaporize insulation. Very high currents produce magnetic forces that bend and twist bus bars. These high currents can pull cables from their terminals and crack insulators and spacers.

Protection against overload and short-circuit:

An overload is an overcurrent confined to normal current paths in which there is no insulation breakdown.

A short-circuit is an overcurrent flowing outside of its normal path. Types of short-circuits are generally divided into three categories: bolted faults, arcing faults, and ground faults.

As an independent supplier, Vandapower can supply a large number of fuses from several brands to protect your system. If you can't find the fuse you need in this folder, just send us a request with the necessary information so that we can help you find the correct fuse.

The most important selection criteria to choose the correct fuse for your application:

- Current Rating
- Voltage Rating
- Interrupting Rating
- Type of Protection and Fuse Characteristics
- Current Limitation
- Physical Size
- Indication

For the ordering codes, please contact us, providing us the above information or the original supplier code.

## Forklift fuses

### 7.3.2 EV and Motor Protection Fuses

Overcurrent protection is critical to personal safety and protection of your system. All electrical systems eventually experience overcurrent's. Unless removed in time, even moderate overcurrent's quickly overheat system components, damaging insulation, conductors, and equipment. Large overcurrent's may melt conductors and vaporize insulation. Very high currents produce magnetic forces that bend and twist bus bars. These high currents can pull cables from their terminals and crack insulators and spacers.

Protection against overload and short-circuit:

An overload is an overcurrent confined to normal current paths in which there is no insulation breakdown.

A short-circuit is an overcurrent flowing outside of its normal path. Types of short-circuits are generally divided into three categories: bolted faults, arcing faults, and ground faults.

As an independent supplier, Vandapower can supply a large number of fuses from several brands to protect your system. If you can't find the fuse you need in this folder, just send us a request with the necessary information so that we can help you find the correct fuse.

The most important selection criteria to choose the correct fuse for your application:

- Current Rating
- Voltage Rating
- Interrupting Rating
- Type of Protection and Fuse Characteristics
- Current Limitation
- Physical Size
- Indication

For the ordering codes, please contact us, providing us the above information or the original supplier code.

## EV – Battery pack fuses

### MEV100 Ferrule fuse Mersen

Type	Voltage Rating	Current Rating	Rated breaking capacity DC	Standard
MEV100C	1000 VDC	8 – 30 A	20 kA	JASO D622 / ISO-TS16949

### MEV100 Surface mount fuse Mersen

Type	Voltage Rating	Current Rating	Rated breaking capacity DC	Standard
MEV100Cxx-S	1000 VDC	8 – 30 A	20 kA	JASO D622 / ISO-TS16949

### MEV100 Round body fuse Mersen

Type	Voltage Rating	Current Rating	Rated breaking capacity DC	Standard
MEV100A	1000 VDC	50 – 300 A	100 kA	JASO D622 / ISO-TS16949
MEV100J	1000 VDC	350 – 600 A	20 kA	JASO D622 / ISO-TS16949

## Motor protection fuses

### Class RK5 fuse Mersen

Type	Voltage Rating	Current Rating	Standard
TR-R	250 VAC / 250 VDC	0,1 – 400 A	UL 248-12 / CSA C22.2
TR-R	160 VDC	3 – 600 A	UL 248-12 / CSA C22.2
TRS-R	600 VAC / 600 VDC	0,1 – 600 A	UL 248-12 / CSA C22.2
TRS-R	300 VDC	15 – 60 A	UL 248-12 / CSA C22.2

### Class RK5 Littelfuse

Type	Voltage Rating	Current Rating	Standard
IDSR	600 VAC / 600 VDC	0,1 – 600 A	UL 248-12 / UL 198M / CSA (File: LR29862)
FLNR	250 VAC / 125 VDC	0,1 – 600 A	UL 248-12 / CSA (File: LR29862)
FLSR	600 VAC / 300 VDC	0,1 – 600 A	UL 248-12 / CSA (File: LR29862)

## 7.4 E-Mobility Motors and Drivers

Today, electric motors form an essential part of the energy-efficient drive technology of industrial machines and electrical transportation. As an independent supplier, Vandapower can supply various type of electrical motors with the wide range of torque and speed.

<b>Servo Motors</b>		
		<p style="text-align: center;"><b>AC Servo Motor</b></p> <ul style="list-style-type: none"> <li>- General purposes</li> <li>- High dynamic</li> <li>- High speed</li> <li>- High precision</li> <li>- High torque</li> <li>- 0.3 - 150 [kW]</li> <li>- 2 - 1 050 [Nm]</li> <li>- 1 000 - 6 000 [rpm]</li> <li>- 230 - 400 [V]</li> </ul>
		<p style="text-align: center;"><b>DC Motor Compact Driver Gear and Electronics</b></p> <ul style="list-style-type: none"> <li>- Integrated commutation electronics with 4-Q speed control</li> <li>- Short design with high torque</li> <li>- Compact drive with integrated EPOS4 positioning and speed controller</li> <li>- High power density</li> <li>- 230 - 316 [W]</li> <li>- 376 - 779 [Nm]</li> <li>- 2 700 - 4 500 [rpm]</li> <li>- 24 - 48 [V]</li> </ul>

<b>AC Motors</b>		
		<p style="text-align: center;"><b>Three-Phase Synchronous Motors</b></p> <ul style="list-style-type: none"> <li>- Variety of IP classes</li> <li>- With smooth shaft and parallel key shaft options</li> <li>- Cooling system</li> <li>- 5.3 - 295 [kW]</li> <li>- 43 - 1 330 [Nm]</li> <li>- 500 - 4 500 [rpm]</li> </ul>
		<p style="text-align: center;"><b>Three-Phase Asynchronous Motors</b></p> <ul style="list-style-type: none"> <li>- All models are optionally available with a brake</li> <li>- High torque accuracy</li> <li>- 3.5 - 400 [kW]</li> <li>- 25 - 3 200 [Nm]</li> <li>- 400 - 3 000 [rpm]</li> </ul>
		<p style="text-align: center;"><b>AC Disc Motors</b></p> <ul style="list-style-type: none"> <li>- Ironcore and Ironless</li> <li>- High torque thanks to NeFeBr magnets</li> <li>- Optionally available with brake, tachometer, encoder and gearbox</li> <li>- 400 - 6 300 [kW]</li> <li>- 0.6 - 80 [Nm]</li> <li>- 350 - 4 500 [rpm]</li> </ul>
		<p style="text-align: center;"><b>MI Asynchronous Motors</b></p> <ul style="list-style-type: none"> <li>- Available individually or as a complete system with separate suitable motor controller (MC-040)</li> <li>- Robust or light, efficient and compact versions with permanent magnet</li> <li>- Complete low voltage drive systems with high power density</li> <li>- 4 - 8 [kW]</li> <li>- 90 [Nm]</li> <li>- 8 000 [rpm]</li> </ul>

<b>DC Motors</b>		
<b>maxon</b>		<p style="text-align: center;"><b>Brushed</b></p> <ul style="list-style-type: none"> <li>- Compact motor due to its ironless winding</li> <li>- Minimal electromagnetic interference</li> <li>- With an efficiency of up to 90%</li> <li>- Speeds of more than 20 000 rpm have been attained with some special versions</li> <li>- 0.3 - 250 [W]</li> <li>- 0.3 - 888 [Nm]</li> <li>- 4 000 - 9 000 [rpm]</li> <li>- 3 - 70 [V]</li> </ul>
		<p style="text-align: center;"><b>Brushless</b></p> <ul style="list-style-type: none"> <li>- The motor has a rotating permanent magnet, with or without ironless winding</li> <li>- It has a Hall sensor to know the position of the motor and thus have a controlled starting of the motor</li> <li>- 0.3 - 600 [W]</li> <li>- 0.8 - 1 040 [Nm]</li> <li>- 6 000 - 110 000 [rpm]</li> <li>- 3 - 60 [V]</li> </ul>
		<p style="text-align: center;"><b>Compact Driver Electronics</b></p> <ul style="list-style-type: none"> <li>- Integrated commutation electronics with 4-Q speed control</li> <li>- Short design with high torque</li> <li>- Compact drive with integrated EPOS4 positioning/speed controller</li> <li>- High power density</li> <li>- 230 - 316 [W]</li> <li>- 376 - 779 [Nm]</li> <li>- 2 700 - 4 500 [rpm]</li> <li>- 24 - 48 [V]</li> </ul>

<b>DC Motors</b>		
		<p style="text-align: center;"><b>Disc Motors</b></p> <ul style="list-style-type: none"> <li>- Direct current disc motors are permanent magnet motors with an ironless rotor and barrel commutator</li> <li>- The shortest design requires only 39.5 mm installation space in the axial direction</li> <li>- 16 - 204 [W]</li> <li>- 0.055 - 1.73 [Nm]</li> <li>- 1800 - 4800 [rpm]</li> <li>- 12 - 48 [V]</li> </ul>
		<p style="text-align: center;"><b>Compact Synchronous Motors</b></p> <ul style="list-style-type: none"> <li>- Permanent magnet synchronous motors with integrated power inverters</li> <li>- The PowerMELA drive concept consists of a permanently excited synchronous reluctance motor and an integrated four-quadrant frequency converter.</li> <li>- 50 - 280 [kW]</li> <li>- 160 - 1 220 [Nm]</li> <li>- 3 000 - 6 000 [rpm]</li> <li>- 400 - 695 [V]</li> </ul>

DC Motor - Compact Designs		
		<p style="text-align: center;"><b>Wheel Drive</b></p> <ul style="list-style-type: none"> <li>- The system is a modular, highly integrated, and compact drive system</li> <li>- The standard configuration consists of the motor, gearhead and encoder</li> <li>- It can be individually supplemented with brake, controller and wheel as desired</li> <li>- 8.5 - 27 [Nm]</li> <li>- 20 - 290 [rpm]</li> <li>- 12 - 60 [V]</li> </ul>
		<p style="text-align: center;"><b>Bike Drive</b></p> <ul style="list-style-type: none"> <li>- Accelerates from 0 to 9 m/s in less than 3 seconds</li> <li>- It enables an average weight cyclist (79.5 kg) to climb an altitude of 975 m at 10% average incline in less than 30 minutes</li> <li>- 500 - 600 [W]</li> <li>- 19 - 26 [Nm]</li> <li>- 183 - 290 [rpm]</li> <li>- 48 [V]</li> </ul>
		<p style="text-align: center;"><b>Wheel Drive</b></p> <ul style="list-style-type: none"> <li>- No gearbox – no wear</li> <li>- Longer service life compared to conventional drive technology</li> <li>- Three standard sizes</li> <li>- Possible to replace the wheel</li> <li>- Can be combined with various controllers</li> <li>- Customer-specific mechanical integration and system connection</li> <li>- 3 - 10 [Nm]</li> <li>- 154 - 530 [rpm]</li> <li>- 48 [V]</li> </ul>

		<p><b>Ket-Rob Drive platform for AGV/AGC</b></p> <ul style="list-style-type: none"> <li>- Complete basic drive module for AGV/AGC</li> <li>- Customer-specific adaptations of the drivers or systems are possible</li> <li>- Dimensioning of the drive platform according to individual requirements</li> <li>- 24 - 48 [V]</li> <li>- 7 [km/h]</li> <li>- 210 [W]</li> <li>- Load capacity: 100 [kg]</li> </ul>
---	---	--

<b>AC Motor - Compact Designs</b>		
		<p style="text-align: center;"><b>Wheel Hub Gears</b></p> <ul style="list-style-type: none"> <li>- Available in single and multilevel versions with different ratios</li> <li>- Optional decoupled version</li> <li>- Running noise &lt; 68 [dB]</li> <li>- Wheel load 700 - 2 100 [kg]</li> <li>- 160 - 800 [Nm]</li> <li>- 6 000 [rpm]</li> </ul>
		<p style="text-align: center;"><b>Ship Motors</b></p> <ul style="list-style-type: none"> <li>- Water cooling in a stainless steel design</li> <li>- Suitable for sophisticated direct drive technology</li> <li>- Encoders: Resolver, SinCos (optional) and Digital encoder (optional)</li> <li>- IP54 type of protection</li> <li>- Other encoders on request</li> <li>- 2.7 - 1 542 [kW]</li> <li>- 140 - 39 500 [Nm]</li> <li>- 100 - 1 500 [rpm]</li> </ul>

### Controllers and Drivers

		<p style="text-align: center;"><b>Frecuency Converter</b></p> <ul style="list-style-type: none"> <li>- Numerous protection and overload functions, such as phase failure detection on the power supply and motor</li> <li>- Extensive control and data management continuously provide an accurate overview of the current drive status</li> <li>- Electronics supply external 24 [VDC]</li> <li>- Supply frequency 47 - 63 [Hz]</li> </ul>
		<p style="text-align: center;"><b>Servo Driver</b></p> <ul style="list-style-type: none"> <li>- Servo drive for higher output ratings</li> <li>- All devices have integrated rectifiers, DC link capacitors and inverters</li> <li>- Water cooling system</li> <li>- 1.1 - 315 [kW]</li> <li>- 2.5 - 615 [A]</li> </ul>
		<p style="text-align: center;"><b>Modular Servo Driver</b></p> <ul style="list-style-type: none"> <li>- Individual modules easily can be removed or added over an integrated drive connect system without having to disconnect the entire drive system</li> <li>- With high-performance power units in air-cooled, water-cooled and cold plate cooling versions</li> <li>- 5 - 200 [kW] DC link power</li> <li>- 3 - 180 [A]</li> </ul>

### Controllers and Drivers

		<p><b>Programmable Master Controllers</b></p> <ul style="list-style-type: none"> <li>- Controlled Variables: Speed, Position and Current</li> <li>- Servo amplifiers for controlling the fast reacting</li> <li>- Programmable multi-axis masters</li> <li>- The frequency ranges depend on which kind of motor and controller you use</li> <li>- 2 - 12 [A]</li> <li>- 10 - 70 [V]</li> </ul>
		<p><b>Drive System for Mobile Applications</b></p> <ul style="list-style-type: none"> <li>- The b maXX mobil can brake in both directions and recover energy in addition to generating drive</li> <li>- With and without galvanic isolation</li> <li>- 40 - 225 [A]</li> <li>- 12 - 14 V</li> </ul>

## 8. AC & DC Contactors

### Possible features

The contactors are available in a lot of possible executions, with several options, all depending on the brand and type:

- AC or DC
- Bidirectional switching possible
- Up to 4800 V and 1100 A
- Single pole and double pole
- NO (Normally Open) or NC (Normally Closed) main contacts
- Several coil voltages possible (12, 24, 48,... VDC)
- Coil suppression possible
- Mounting orientation: horizontal, vertical,...
- Auxilliary contacts possible
- Sealed versions possible
- With gas chamber or with blowout magnets
- Monostable or bistable switching

### Possible brands/suppliers

## 9. Truck and Trailer

### ERICH JAEGER CONNECTORS

For more than 90 years, ERICH JAEGER has been developing and manufacturing high-quality connector systems for different branches of industry, particularly the light and commercial vehicle sector. And they are taking their products to the next level with developing high-speed data connectors for the data transmission between towing vehicle and trailer.

### Standards

We offer trailer connector systems including plugs, sockets and cables according to more than 25 different international standards covering all kinds of vehicles from agricultural machinery to cars and commercial vehicles to defense technology. Our products cover different types of standards like ISO, DIN, SAE, VG and more.

## 2-Pole Connectors (VG 96917)

### Female connector

Ordering code	Description	
EJ-151208*	Erich Jaeger - 2P/24V socket - 135A - kit	
EJ-151211*	Erich Jaeger - 2P/24V socket - 168A - kit	
EJ-382092	2P/24V main contact - 135A - 35 mm <sup>2</sup>	
EJ-382093	2P/24V main contact - 168A - 50 mm <sup>2</sup>	

### Male connector

Ordering code	Description	
EJ-251097*	Erich Jaeger - 2P/24V plug - 135A - kit (rubberized)	
EJ-251098*	Erich Jaeger - 2P/24V plug - 168A - kit (rubberized)	
EJ-251269*	Erich Jaeger - 2P/24V plug - 135A - kit	
EJ-251270*	Erich Jaeger - 2P/24V plug - 168A - kit	
EJ-021797-1	2P/24V main contact - 135a - 35 mm <sup>2</sup>	
EJ-021814-1	2P/24V main contact - 168a - 50 mm <sup>2</sup>	

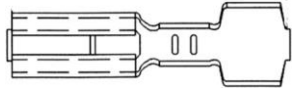

## 7-Pole/12V Connectors - Iso 1724 (Type N)

### Socket connector

Ordering code	Description	
EJ-101371	Erich Jaeger - 7P/12V - socket - kit	
EJ-382510	7P/12V - socket - housing	
EJ-382509	7P/12V socket - socket - contact insert	
EJ-380511	Crimp contact insert	
EJ-034915	Seal for multi core cable	
EJ-052675-4	Main contact - female - 1-2.5 mm <sup>2</sup>	
EJ-025462-3	Main contact - male - 1 mm <sup>2</sup>	
EJ-025434-3	Main contact - male - 1.5 mm <sup>2</sup>	
EJ-025436-3	Main contact - male - 2.5 mm <sup>2</sup>	
EJ-025463-3	Main contact - female - 1 mm <sup>2</sup>	
EJ-025020-3	Main contact - female - 1.5 mm <sup>2</sup>	
EJ-025148-3	Main contact - female - 2.5 mm <sup>2</sup>	
EJ-025277-3	Main contact - female - 4 mm <sup>2</sup>	
EJ-055632	Single wire seal - 1-2.5 mm <sup>2</sup>	

EJ-026077	3P receptacle housing - left	
EJ-026076	3P receptacle housing - right	
EJ-056077-4	Type N - receptacle	

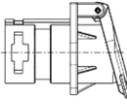

<b>Plugs and adapters</b>		
<b>Ordering code</b>	<b>Description</b>	
EJ-201240	Erich Jaeger - 7P/12V - screw contact - cable diameter 6.30-8.30 mm	
EJ-201212	Erich Jaeger - 7P/12V - screw contact - cable diameter 9.20-11.50 mm	
EJ-311009-BK	Short adapter 13P-7P - nickel	
EJ-311041	Short adapter 13P-7P - standard	
EJ-311067-BK	Shorty - mini short adapter 13P-7P	
EJ-311164	Economy shorty - mini short adapter 13P-7P	
EJ-311104-BK	Mika 2 - mini short adapter 7P-13P	

EJ-311188	Economy - mini short adapter 7P-13P	
-----------	-------------------------------------	---

## 7-Pole/24V Connectors - ISO 1185 (Type N)

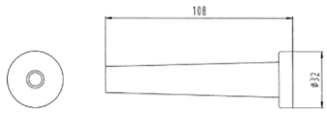

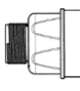

### Socket connector

Ordering code	Description	
EJ-111317	Erich Jaeger - 7P/24V - socket - kit	
EJ-383357	7P/24V - socket - housing	
EJ-383175	7P/24V socket - socket - contact insert	
EJ-037742-4	Contact sleeve - 1.5-2.5 mm <sup>2</sup>	
EJ-055648	Single wire seal - 1.5-2.5 mm <sup>2</sup>	
EJ-037743	Single wire seal - 2.5-3.5 mm <sup>2</sup>	
EJ-026230	7P/12,24V weather lock seal	

EJ-382620	180° end cap	
EJ-382521	90° end cap	

### Plug connector

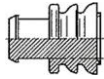

Ordering code	Description	
EJ-111317	Erich Jaeger - 7P/24V - plug - kit	
EJ-038444	Cable outlet for plugs - 8.5-10.5 mm	
EJ-035490	Cable outlet for plugs - 10-12 mm	
EJ-036102	Seal	
EJ-035880	Sealing plug - 5.80-6.20 mm	
EJ-035206	Single wire seal - 7-8 mm	
EJ-036488	Single wire seal - 7.60-9.80 mm	
EJ-035310	Single wire seal - 9.20-11.50 mm	
EJ-035878	Single wire seal - 5.60-6.40 mm	
EJ-025308	Union nut	
EJ-025309	Sliding ring	
EJ-026206	Screw cap	

## 13-Pole/12V Connectors - ISO 11446

### Socket connector

Ordering code	Description	
EJ-121314	Erich Jaeger - 13P/12V Jaeger expert - socket - tin contact - kit	
EJ-121322	Erich Jaeger - 13P/12V Jaeger expert - built in socket - nickel contact - kit	
EJ-382594	13P/12V Jaeger expert socket - tin contact - without switch	
EJ-382595	13P/12V Jaeger expert - socket - tin contact - reed switch opening	
EJ-382596	13P/12V Jaeger expert - socket - tin contact - captive screws	
EJ-382597	13P/12V Jaeger expert - socket - tin contact - captive screws - switch opening	
EJ-383085	13P/12V Jaeger expert - built in socket - housing	
EJ-026988	End cap	
EJ-037752	Bending protection grommet	
EJ-382598	Contact insert	

EJ-031828	Reed switch	
EJ-053861-4	Main contact - female - 0.5-1 mm <sup>2</sup>	
EJ-052675-4	Main contact - female - 1-2.5 mm <sup>2</sup>	
EJ-059124	Stuff plug	
EJ-053862	Single wire seal - 0.5-1 mm <sup>2</sup>	
EJ-05362	Single wire seal - 1-2.5 mm <sup>2</sup>	
EJ-037129	Multi core cable seal	
EJ-037841	Multi core cable seal - with water drainage	

### Plug connector

Ordering code	Description	
EJ-221097-BK	Erich Jaeger - 13P/12V - plug - nickel - 5.60-6.40 mm - 8x contact	
EJ-221019	Erich Jaeger - 13P/12V - plug - nickel - 9.20-11.50 mm	
EJ-221036-BK	Erich Jaeger - 13P/12V - plug - bronze - 9.20-11.50 mm + sealing ring	
EJ-221029-BK	Erich Jaeger - 13P/12V - plug - standard - 11.40-14 mm	
EJ-221032	Erich Jaeger - 13P/12V - plug - standard - 11.40-14 mm + sealing ring	
EJ-380382	Screw contact pin - short	
EJ-380381	Screw contact pin - long	
EJ-301161	Coupler	

## Coils and cables

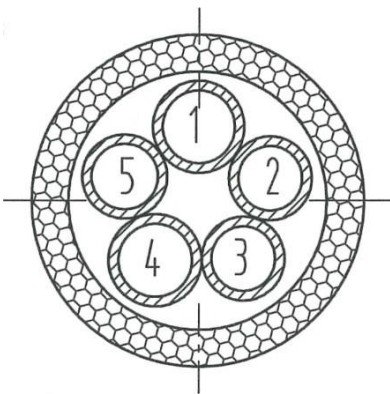

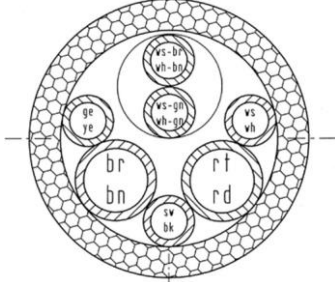

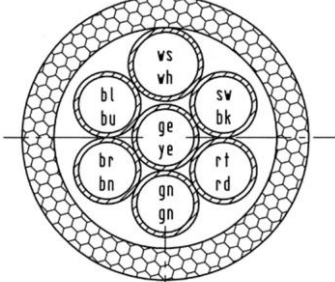

### Coils

Ordering code	Description
K-EJ-016558	2-pole coil - 35 mm <sup>2</sup> - 3.5-4 m*
K-EJ-016559	2-pole coil - 35 mm <sup>2</sup> - 3.5-4 m*
K-EJ-016271	7-pole coil - 6x 1.5 mm <sup>2</sup> + 1x 2.5mm <sup>2</sup> - 4-4.5 m* - black
K-EJ-017672	7-pole coil - 6x 1.5 mm <sup>2</sup> + 1x 2.5mm <sup>2</sup> - 4-4.5 m* - green
K-EJ-016769	15-pole coil - 12x 1.5 mm <sup>2</sup> + 3x 2.5mm <sup>2</sup> - 3-4 m* - black

### Cables

Ordering code	Description	
K-EJ-784863	2-pole click in cable 2x 1.5 mm <sup>2</sup> 100 m ring	

<p>K-EJ-784969</p>	<p>5-pole ABS cable 3x 1.5mm<sup>2</sup> + 2x 4 mm<sup>2</sup> 25 m ring</p>	
<p>K-EJ-784970</p>	<p>7-pole EBS cable 5x 1.5 mm<sup>2</sup> + 2x 4 mm<sup>2</sup> 25 m ring</p>	
<p>K-EJ-784972</p>	<p>7-pole cable 6x 1 mm<sup>2</sup> + 1x 1.5 mm<sup>2</sup> 50 m ring</p>	
<p>K-EJ-784971</p>	<p>15-pole cable 12x 1.5 mm<sup>2</sup> + 3x 2.5 mm<sup>2</sup> 25 m ring</p>
